### So far pretty good

Really nice for a no-frills fridge. I decided against the water/ice dispenser on the door since it was just something else that could get broken and we use bottled water anyway. I still have the ice dispenser in the freezer which is nice because the kids don't abuse it like they did the one on my last fridge. The 10 yr warranty on the compressor brings peace of mind. And knowing that this is an American made product (unlike my last fridge) I feel confident that I can get replacement parts easily if I need to. That may sound silly, but it is the reason I needed a new fridge. A part broke on my last one and I spent a lot of time and money trying to get it replaced only to get the wrong part sent to me several times. Too much headache. I'm looking forward to better dependability and easier access to parts if needed. And that's what I feel I'm getting since Maytag has been in this market forever.

For a remodeled kitchen. Had issues with another being too deep for the space. Stuck way out into the room. My salesman researched a model for my requirements and found this. Fits perfectly! Love the look and easy to use.
