SAMSUNG

23 cu. ft. Counter-Depth, 3-Door French Door Refrigerator with CoolSelect Pantry™

Installation Specifications

1. Measure the height, width and depth of the opening, making sure to include baseboards, molding tile, countertop overhang, etc. Check to be sure there is enough room to open the door (consider walls, islands or other obstacles when measuring).
2. Refer to illustration below to determine dimensions.
3. Allow 2.5" of clearance on hinge side of refrigerator when installing next to a wall where handle may make contact.
4. Allow 1" minimum clearance at rear for proper air circulation and water/electrical connections. Allow a 3/8" minimum clearance at sides and top for ease of installation.
5. Ensure each door and entryway in the home is wide enough for the refrigerator to be moved through easily.

For optimal usage and to be able to open refrigerator doors completely, do not install next to a wall.

Please note: The following dimension and cutout information is for planning purposes only. For complete installation details, consult manual packed with product, or download manual online at samsung.com.

Samsung Front Control Slide-in Gas Range with Convection

6.0 cu. ft. Capacity

Installing Your Range

A: Cabinet opening 30"

IMPORTANT: If your cabinets are over 37" high, you must install this range on a hard, heat-resistant support that raises the surface of the range so that it is about even with the countertop.

*Side clearance above cooking surface to any objects, i.e., wall.

IMPORTANT: Consult with Installation Manual for detailed instructions before installing.
All ranges must be installed with the Anti-Tip device that is included.

preparing the dishwasher enclosure

PRODUCT DIMENSIONS

ENCLOSURE DIMENSIONS

 This dishwasher is designed to be enclosed on the top and on both sides by a standard residential kitchen cabinet unit.

The installation enclosure must be clean and free of any obstructions.

The enclosure must be at least 24 inches wide, 24 inches deep, and 34 1/8 inches high.

For the front door of the dishwasher to be flush with the leading edge of the counter top, the counter top must be at least 25 inches deep.

SAMSUNG

Samsung Front Load Washer with Steam

5.2 cu. ft. Capacity IEC

Signature Features

Steam

- Powerful stain removal without pretreatment while still gentle on your clothing.

Self Clean+

- Keeps your washer drum fresh and clean by eliminating 99% of bacteria¹. Will also send a reminder to clean the drum every forty wash cycles.

Closet-Depth Fit²

- This washer fits within your existing laundry space without sacrificing any capacity thanks to our new, wider drum.
- A new control panel design provides better visibility so it is easy to use even when stacked.

Dimensions

Type		Front loading dryer
Dimensions (in. (mm))	A. Overall height	38.7 (984)
	B. Width	27.0 (686)
	C. Depth with door open	52.6 (1335)
	D. Depth	31.5 (800)

Installation requirements

Clearance requirement

This clearance requirement is applicable for dryers only.

NOTE

- For washer's clearance requirement, see the washer's user manual.
- If the washer and dryer have different clearance requirements, use the one with the larger value.

Alcove or closet installations

WARNING

- The dryer must be exhausted to the outside to reduce the risk of fire when installed in an alcove or closet.
- No other fuel-burning appliance should be installed in the same closet as the dryer.
- Place the dryer at least 18 in. (460 mm) above the floor for garage installation.

Minimum clearance for stable operation:

Sides	Top	Rear	Front
1 in. (25 mm)	1 in. (25 mm)	5.9 in. (150 mm)	1 in. (25 mm)

If both the washer and a dryer are installed in the same location, the front of the alcove or closet must have two unobstructed air openings for a combined minimum total area of 72 in.² (465 cm²).

Undercounter installation

A	39.6 in. (1006 mm)
B	1 in. (25 mm)
C	1 in. (25 mm)

Pedestal installation

A	5.9 in. (150 mm)
B	6 in. (152 mm)
C	52.0 in. (1320 mm)

Installation requirements

This clearance requirement is applicable for washer and dryer pair installation.

Side by side installation

Stacked installation (Model: SKK-8K)

A	1 in. (25 mm)
B	5.9 in. (150 mm)
C	7.1 in. (180 mm)
D	6 in. (152 mm)
E	78.5 in. (1994 mm)

NOTE

Stacking (MODEL NO: SKK-8K)

Many of Samsung's washers and dryers can be stacked to maximize usable space. You can purchase an optional stacking kit from your Samsung retailer. For details about stacking and compatible models, refer to the user manual included in the stacking kit you purchase.

Ducting requirements

Weather hood type	Recommended	Use only for short-run installation
	 4" (10.2 cm)	 2.5" (6.4 cm)
No. of 90° elbows	Rigid	Rigid
0	80 ft. (24.4 m)	74 ft. (22.6 m)
1	68 ft. (20.7 m)	62 ft. (18.9 m)
2	57 ft. (17.4 m)	51 ft. (15.5 m)
3	47 ft. (14.3 m)	41 ft. (12.5 m)

NOTE

* Use a 4-inch (10.2 cm) diameter rigid aluminum or galvanized steel duct.

If you integrate the dryer's vent system with an existing exhaust system:

- Make sure the exhaust system meets all applicable local, state, and national regulations.
- Verify you are not using flexible plastic duct.
- Make sure to check for and remove all lint buildup from inside the existing ducts.
- Confirm the duct is not kinked or crushed.
- Make sure the exhaust hood damper opens and closes freely.

Manometer measurements

The static pressure in any exhaust system must not exceed 0.83 inches of water column or be less than 0. Note that these values are measured with the dryer running with a manometer presented to the exhaust duct that connects to the dryer. The dryer tumbler must be empty and lint filter clean.

Installation requirements

Exhausting requirements

The dryer must not be exhausted into a chimney, a wall, a ceiling, an attic, a crawl space, or a concealed space of a building. Exhausting the dryer to the outside will prevent large amounts of lint and moisture from being blown into the room.

In the United States and Canada

- All dryers must be exhausted to the outside.
- The required exhaust duct is 4 inches (10.2 cm) in diameter.
- See “**Ducting requirements**” in the “**Installation**” section for the maximum duct length and number of bends that can be used.
- The total length of flexible metal duct must not exceed 7' 10 1/2" (2.4 m).
- Do not assemble the duct with screws or other fasteners that extend into the duct and catch lint.
- **For the United States only:** Use only those foil-type flexible ducts, if any, specifically identified for use with the appliance by the manufacturer and that comply with the Outline for Clothes Dryer Transition Duct. Use Subject 2158A.

Outside the United States and Canada

- Refer to the local codes.

WARNING

- You must exhaust the dryer to the outside to reduce the risk of fire when you install the dryer in an alcove or closet.
- Do not use a plastic or non-metal flexible duct.
- If your existing ductwork is plastic, non-metal, or combustible, replace it with metal.
- Use only a metal exhaust duct that is non-flammable to ensure containment of exhaust air, heat, and lint.

2. INSTALLATION INSTRUCTIONS (continued)

PREPARING THE INSTALLATION

- **For indoor use only.**
- **For household use only. This hood is not to be used to exhaust explosive or dangerous fumes or materials.**
- For your safety and for optimum performance, refer to the 'Installation Drawings' below for the distance required between the cooktop and the range hood taking into consideration the height of the ceiling. If the instructions for installation of the gas hob specify a greater distance, this has to be taken into account as well.
- The exhaust air must not be discharged into a chimney that is used for exhausting fumes from other appliances that burn gas or other fuels.
- Determine the exact location of the vent hood. Mark the location. Find the centerline of the cooktop. Use a level to draw a vertical straight pencil line on the wall.
- Plan the route for venting exhaust to the outdoors. Use the shortest and straightest duct route possible. Make sure the first duct runs is at least 12" before redirecting. Long duct runs, elbows and transitions will reduce the performance of the hood. Use as few of them as possible. Larger ducting may be required for longer duct runs.
- Install a wall cap with damper or roof cap at the exterior opening / wall. Join the wall cap or roof cap to the ductwork.
- Connect round metal ductwork to cap and work back towards the hood location. Use a 2" metal foil duct tape to seal the joints.

INSTALLATION DRAWINGS

It is important to install the hood at the proper mounting height. Hoods mounted too low could result in heat damage and fire hazard; while hoods mounted too high will be hard to reach and will lose its performance and efficiency.

- For ceilings of 8', the hood distance above an electric cooking surface must not be less than **28"**.

The hood distance above a gas cooking surface must not be less than **30"**.
- For ceilings of 9' or more, the minimum hood distance must be no less than **30"** for any type of cooktop.
