# MONOGRAM 36" DUAL-FUEL PROFESSIONAL RANGE WITH 6 BURNERS

ZDP366NNSS (NATURAL GAS)

## THE MONOGRAM STATEMENT COLLECTION

Edge-to-edge handles, polished stainless steel, smoothly finished edges and large electronic control knobs offer an authentic professional appearance.

## SEALED, DUAL-FLAME STACKED BURNERS

Deliver a full spectrum of heat settings, from an ultra-low 140° F simmer to an intense 18,000 BTU

## MONOGRAM PROFESSIONAL OVEN SYSTEM

Combines European, reverse-air convection technology and six heating elements to provide superb baking results

## HEAVY-DUTY, FULL-EXTENSION RACKS

Glide smoothly in and out on stainless steel ball bearings for easy access, and are designed to remain in the oven during the self-clean cycle

## LED TASK LIGHTS

Below the bullnose, provide a functional and theatrical touch

## ELECTRONIC IGNITION WITH AUTOMATIC REIGNITION

Ensures a continuous flame and reignites automatically if accidentally extinguished

## STAR-K CERTIFICATION

Allows Monogram ranges to operate in Sabbath mode

## OPTIONAL FULL-WIDTH STAINLESS STEEL TOEKICK

Is included with the range

## LARGE TEMPERATURE AND TIME DISPLAYS

Make it easy to monitor cooking progress

## HALOGEN LIGHT COLUMNS

Provide a clear view, regardless of rack position

## REVERSIBLE BURNER GRATES

Flat on one side and uniquely contoured on the other to accommodate round-bottom woks

\*Natural Gas Model

Product Specification Revised 11/20

7V-13

Jan 21, 2021

#### SPECIFICATIONS

Overall Width	35 7/8" (911 cm)
Overall Height	35 1/4" (89.5 cm)
Overall Depth	30 7/8" (78.4 cm)
Door Clearance	48 1/4" (122.5 cm)
Cutout Width	36" (91.4 cm)
Cutout Height	35 1/4" - 36 3/4" (89.5 - 93.3 cm)
Shipping Weight	462 lbs (209.5 kg)

#### ATTENTION ELECTRICIAN:

Electrical requirements: Ranges must be supplied with 208/240V, 60Hz, and connected to an individual, properly grounded branch circuit protected by a circuit breaker or time-delay fuse. Install a 30-amp circuit for 36" ranges. The receptacle must be a NEMA 14-50R device to accept the four-prong plug on the range.

#### OVERALL DIMENSIONS

DIMENSIONS AND INSTALLATION  
INFORMATION (IN INCHES)

HELPFUL TIPS

Professional ranges offer a number of choices in size and cooktop configurations.  
All Dual-Fuel Professional Ranges are factory set for natural gas.

**NOTE**  
A propane conversion kit is included with the range. High Altitude kit, WB28K10553 for operation above 6,000 feet (for Natural and L.P. gas models), is also available. The kits must be installed by a qualified service technician at additional cost.

INSTALLATION INFORMATION

Before installing, consult installation instructions packed with product or online at [Monogram.com](http://Monogram.com) for current dimensional data. A suitable overhead vent hood is required for models with a grill and is recommended for all other models.

ADVANCE PLANNING

Refer to dimensional drawings for appropriate placement and necessary clearances when planning the installation.

- Working areas adjacent to the range should have 18" minimum clearance between countertop and cabinet bottom.
- Clearance between range and side wall or combustible material must be at least 12" on each side.
- Installation must conform with local codes. In the absence of local codes, the range must comply with the National Fuel Gas Code, ANSI Z223.1-1990.

**WARNING**

Installations without a hood require 48" minimum to combustibles. A custom hood installation with exposed horizontal combustible surfaces must have an Auto-On feature. Refer to hood installation instructions for specific hood clearances.

The surface of the entire back wall above the range and below the hood must be covered with a non-combustible material such as metal, ceramic tile, brick, marble or other stone.

PV-13

Jan 21, 2021

## DIMENSIONS AND INSTALLATION INFORMATION (IN INCHES)

### UTILITY LOCATIONS

Locate gas and electric as shown

12" min. to combustibles or 0" to a non-combustible material above the cooking surface

### HELPFUL TIPS

#### GAS SUPPLY

- The natural gas models are designed to operate at 5" water column pressure. For proper operation, the pressure of the natural gas supplied to the regulator must be between 7" and 13" water column.
- The LP models are designed to operate at 10" water column pressure. For proper operation, the pressure of the LP gas supplied to the regulator must be between 11" and 13" water column.

#### OPTIONAL BACKSPLASH ACCESSORIES

- The range requires a 12" minimum clearance to a vertical combustible surface at the rear. A backsplash is required for installations with less than 12" clearance. The following backsplash accessories are available, or a custom, non-combustible backsplash can be used.
- Order one with a 36"-wide range backsplash:
  - UX12B36PSS-12"-height backsplash
  - UXADJB36PSS-30"-36" adjustable-height backsplash with warming shelf

LOCATION REQUIREMENTS

Proper installation is your responsibility.

You will need:

- A water heater set to 120°F (49°C).
- A grounded electrical outlet located within 6 ft (1.8 m) of power cord on back of washer.
- Hot and cold water faucets located within 4 ft (1.2 m) of hot and cold water fill valves on washer, and water pressure of 20–100 psi (137.9–689.6 kPa).
- A level floor with maximum slope of 1" (25 mm) under entire washer. Installing on carpet or surfaces with foam backing is not recommended.
- Floor must support washer's total weight (with water and load) of 315 lbs (143 kgs).

**IMPORTANT:** Do not install, store, or operate washer where it will be exposed to weather or in temperatures below 32°F (0°C). Water remaining in washer after use may cause damage in low temperatures. See "Washer Care" in your Use and Care Guide for winterizing information.

Whirlpool Models\*

\*For additional details (or information) specific to your model, refer to the 'Dimensions' listed for your model at [www.whirlpool.com](http://www.whirlpool.com).

PV-13  
Jan 21, 2021

Maytag Models

All dimensions show minimum spacing allowed. For each arrangement, consider allowing more space for ease of installation and servicing, and spacing for companion appliances and clearances for walls, doors, and floor moldings. Space must be large enough to allow door to fully open. Add spacing of 1" (25 mm) on all sides of washer to reduce noise transfer. If a closet door or louvered door is installed, top and bottom air openings in door are required.

Recessed area or closet installation (stacked washer and dryer):

Jan 21, 2021

The technical drawings show the front and side views of the washing machine with the following dimensions:

- Front View:**
  - Top panel width: 1" (25 mm)
  - Door width: 1" (25 mm)
  - Door height: 1" (25 mm)
  - Bottom panel width: 1" (25 mm)
  - Bottom panel height: 1" (25 mm)
- Side View:**
  - Top panel depth: 0.25" (5 mm)
  - Door depth: 1" (25 mm)
  - Bottom panel depth: 1" (25 mm)
  - Bottom panel height: 1" (25 mm)

The drain system can be installed using a floor drain, wall standpipe, floor standpipe, or laundry tub. Select the method you need.

**IMPORTANT:** To avoid siphoning, only 4.5" (114 mm) of drain hose should be inside standpipe. Always secure drain hose with cable tie.

Minimum diameter for a standpipe drain: 2" (51 mm). Minimum carry-away capacity: 17 gal. (64 L) per minute. A 1/4" (6 mm) diameter to 1" (25 mm) diameter Standpipe Adapter Kit is available (Part Number 3363920). Top of standpipe must be at least 30" (762 mm) high; install no higher than 96" (2.44 m) from bottom of washer. If you have an overhead sewer and need to pump higher than 96" (2.44 m), a sump pump and associated hardware are needed. See "Alternate parts."

See requirements for floor standpipe drain system.

Minimum capacity: 20 gal. (76 L). Top of laundry tub must be at least 30" (762 mm) above floor; install no higher than 96" (2.44 m) from bottom of washer.

PV-13  
Jan 21, 2021

#### Floor drain system

Floor drain system requires a Siphon Break Kit, two Connector Kits, and an Extension Drain Hose that may be purchased separately. Please contact your retailer for ordering information, or see the "Assistance or Service" page on the back of your Use and Care Guide. Minimum siphon break height: 28" (710 mm) from bottom of washer. (Additional hoses may be needed.)

#### ELECTRICAL REQUIREMENTS

##### ⚠ WARNING

##### Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

- A 120 V, 60 Hz., AC only, 15 or 20 A, fused electrical supply is required. A time-delay fuse or circuit breaker is recommended. It is recommended that a separate circuit breaker serving only this appliance be provided.
- This washer is equipped with a power supply cord having a 3 prong grounding plug.
- To minimize possible shock hazard, the cord must be plugged into a mating, 3 prong, grounding-type outlet, grounded in accordance with local codes and ordinances. If a mating outlet is not available, it is the personal responsibility and obligation of the customer to have the properly grounded outlet installed by a qualified electrician.
- If codes permit and a separate ground wire is used, it is recommended that a qualified electrician determine that the ground path is adequate.
- Do not ground to a gas pipe.
- Check with a qualified electrician if you are not sure the washer is properly grounded.
- Do not have a fuse in the neutral or ground circuit.

#### GROUNDING INSTRUCTIONS

##### For a grounded, cord-connected washer:

This washer must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electrical shock by providing a path of least resistance for electric current. This washer is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

**WARNING:** Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or serviceman if you are in doubt as to whether the appliance is properly grounded.

Do not modify the plug provided with the appliance – if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

#### INSTALLATION INSTRUCTIONS

##### ⚠ WARNING

##### Excessive Weight Hazard

Use two or more people to move and install washer.

Failure to do so can result in back or other injury.

**NOTE:** To avoid floor damage, set washer onto cardboard before moving it.

##### 1. Move washer

It is necessary to remove all shipping materials for proper operation and to avoid excessive noise from washer.

Move washer to within 4 ft (1.2 m) of its final location. It must be in a fully upright position.

PV-13

Jan 21, 2021

Additional parts may be required, depending on your installation. Check local codes. Check existing electrical supply and venting. Read "Electrical Requirements" and "Venting Requirements" before purchasing parts.

#### If using a power supply cord:

Use a UL Listed power supply cord kit marked for use with clothes dryers. The kit should contain:

- A UL Listed 30 amp power supply cord, rated 120/240 volt minimum. The cord should be type SRD or SRDT and be at least 4 ft. (1.22 m) long. The wires that connect to the dryer must end in ring terminals or spade terminals with upturned ends.
- A UL Listed strain relief.

#### Optional Equipment (not supplied with dryer):

Refer to your Use and Care Guide for information about accessories available for your dryer.

## LOCATION REQUIREMENTS

Check code requirements. Some codes limit, or do not permit, installing dryer in garages, closets, mobile homes, or sleeping quarters. Contact your local building inspector.

**⚠ WARNING**

**Explosion Hazard**

Keep flammable materials and vapors, such as gasoline, away from dryer.

Place dryer at least 18 inches (460 mm) above the floor for a garage installation.

Failure to do so can result in death, explosion, or fire.

#### You will need:

- A location allowing for proper exhaust installation. See "Venting Requirements."
- A separate 15 or 20 amp circuit for a gas dryer or 30 amp circuit for an electric dryer.
- If using power supply cord, a grounded electrical outlet located within 2 ft. (610 mm) of either side of dryer. See "Electrical Requirements."
- Floor must support dryer weight of 200 lbs. (90.7 kg). Also consider weight of companion appliance.
- Cold water faucets located within 4 ft. (1.2 m) of the water fill valves, and water pressure of 20–120 psi (138–827 kPa). You may use your washer's water supply by purchasing the necessary parts noted in "Parts needed."
- Level floor with maximum slope of 1" (25 mm) under entire dryer. If slope is greater than 1" (25 mm), install Extended Dryer Feet Kit, Part Number 279810. If not level, clothes may not tumble properly and automatic sensor cycles may not operate correctly.
- For garage installation, place dryer at least 18" (460 mm) above floor. If using a pedestal, you will need 18" (460 mm) to bottom of dryer.
- The dryer must not be installed or stored in an area where it will be exposed to water and/or weather.

**IMPORTANT:** Do not operate, install, or store dryer where it will be exposed to water, weather, or at temperatures below 40°F (4°C). Lower temperatures may cause dryer not to shut off at end of automatic sensor cycles, resulting in longer drying times.

## DRYER DIMENSIONS

Front view:

Side view:

Whirlpool Models

\*Approx. measurement

Maytag Models

\*Approx. measurement

PV-13  
Jan 21, 2021

#### Back view:

**NOTE:** Most installations require a minimum of 5" (127 mm) clearance behind dryer for exhaust vent with elbow. See "Venting Requirements."

#### Installation Clearances

For each arrangement, consider allowing more space for ease of installation and servicing, spacing for companion appliances, and clearances for walls, doors, and floor moldings. Space must be large enough to allow door to fully open. Add spacing on all sides of dryer to reduce noise transfer. If a closet door or louvered door is installed, top and bottom air openings in door are required.

Check code requirements. Some codes limit, or do not permit, installation of the dryer in garages, closets, mobile homes, or sleeping quarters. Contact your local building inspector.

**NOTE:** No other fuel-burning appliance can be installed in the same closet as a dryer.

#### Installation spacing for recessed area or closet installation

All dimensions show recommended and minimum spacing allowed.

- Additional spacing should be considered for ease of installation and servicing.
- Additional clearances might be required for wall, door, floor moldings, dryer venting, and gas line.
- Additional spacing should be considered on all sides of the dryer to reduce noise transfer.
- For closet installation with a door, minimum ventilation openings in the top and bottom of the door are required. Louvered doors with equivalent ventilation openings are acceptable.
- Companion appliance spacing should also be considered.

#### Recommended installation clearances (dryer only):

0" (0 mm) rear spacing is allowed for straight back venting only. For steam models only, inlet hose must not be kinked.

#### Custom under-counter installation:

#### Mobile home – Additional installation requirements:

This dryer is suitable for mobile home installations. The installation must conform to the Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 3280 (formerly the Federal Standard for Mobile home construction and Safety, Title 24, HUD Part 280) or Standard CAN/CSA-Z240 MH.

#### Mobile home installations require:

- Metal exhaust system hardware, available for purchase from your dealer. For further information, see "Assistance or Service" in your Use and Care Guide.
- Special provisions must be made in mobile homes to introduce outside air into dryer. Openings (such as a nearby window) should be at least twice as large as dryer exhaust opening.

#### For mobile home installation of gas dryers:

- Mobile Home Installation Hold-down Kit Part Number 346764 is available to order. For further information, see "Assistance or Service" in your Use and Care Guide.

MONOGRAM 24" FULLY  
INTEGRATED DISHWASHER  
ZDT985SPNSS

**THE MONOGRAM STATEMENT COLLECTION**

Polished stainless steel, and hand-finished edges convey a sense of solidity and beauty

**ADVANCED WASH SYSTEM**

Designed to achieve the ultimate clean, this advanced wash system with over 90 powerful jets delivers complete washing coverage to every corner of the dishwasher

**FULL-EXTENSION, ADJUSTABLE THIRD RACK WITH PREMIUM SLIDES**

Convenient and adjustable, this expansive third rack easily accommodates an entire flatware collection, plus carving knives, soup ladles and other cooking/serving tools for the ultimate clean

**STEAM + SANITIZATION**

Eliminate the need to pre-wash dishes at the end of every meal, thanks to a Steam + Sani feature that easily loosens lingering traces of food with an added bonus of complete sanitization, removing 99.999% of bacteria

**39 DBA QUIET OPERATION**

Is made possible by advancing sound-absorbing materials and a smooth-running motor

**HARD FOOD DISPOSER**

Designed to maintain a kitchen's cleanliness and efficiency, the hard food disposer with stainless steel blades grinds food into tiny particles that wash away with ease

**MAX DRY SYSTEM**

This precise and efficient drying system delivers beautifully dry dishes every time and is perfect for hard-to-dry items like your favorite champagne flutes

**BOTTLE JETS**

Hard-to-reach areas inside tall items get completely clean with four dedicated jets integrated into the upper rack that shower water deep inside for the ultimate clean

**LED LIGHTING**

Illuminates the entire interior, leaving no question as to whether or not dishes have been cleaned

**DEEP CLEAN SILVERWARE JETS**

Powerful jets blast away stuck-on food for silverware that's always spotless

**FLUSH INSTALLATION CAPABILITY**

Enables the dishwasher to be installed flush, even with inset cabinetry, without any additional parts

For questions about your  
appliance, please call 1-800-626-2000.

## FLUSH CUTOUT INSTALLATION

## INSTALLATION CUTOUT FRONT VIEW

## SPECIAL NOTES

- A The dishwasher drain hose must be no more than 12 feet in length for proper drainage.
- B Electrical connections are at the right front of the dishwasher and water connections are on the left. The hot water line should extend forward 30" to 40" from the rear wall. The electrical must extend forward at least 24" to reach the junction box.
- C To prevent siphoning, an air gap or high drain loop must be used.

For more details, refer to the installation instructions for this product on [Monogram.com](http://Monogram.com). Dimensions in parentheses are in centimeters unless otherwise noted.

## ANTI-TIP BRACKET INSTALLATION

### A Attachment to Wall and Floor

## AIR GAP INSTALLATION DIMENSIONS

Each Side 1/8" (3 cm)  
Top 1" (2.5 cm)  
Back 2" (5.1 cm)

## HELPFUL TIPS

- A The refrigerator is top heavy and must be secured to prevent the possibility of tilting forward.

### ⚠ WARNING:

#### Wood Wall and Floor Construction:

- Drill the appropriate number of 1/8" (3 mm) pilot holes in the center of each floor bracket hole being used (a nail or awl may be used if a drill is not available) AND remove the locator template from the floor.
- Mount the anti-tip floor bracket by fastening the 2, or recommended 4, #10-16 hex-head screws tightly into place as illustrated in figure 3.
