PREPARING THE CUT-OUT

1. Using a jigsaw or reciprocal saw cut an opening in the bottom of the cabinet, inside the frame.

NOTE: For frameless cupboards, a $\frac{3}{4}$ " (1.9 cm) front and rear edge is required to form a frame in the bottom of the cabinet. A $\frac{3}{4}$ " (1.9 cm) thick support rod (not included) may be required for certain types of cabinets.

OPENING DIMENSIONS

Model AVM-278PS

A = Opening in the cupboard

Model AVM-368PS

- Remove the decorative panel from the range hood.
 - Cut a hole in the bottom of the cabinet, using the dimensions shown in the table above, according to the model.
 - Insert the hood in the cabinet and secure with the (4) mounting screws from the inner side of the range hood. Make certain that the hood is secure before releasing.
Note: Wood blocking might be necessary if there is no frame to secure the mounting screws.
 - Replace the decorative panel.
2. Complete the closet preparation according to the instructions for the type of home evacuation. Determine the location of the ventilation openings and cut out the openings in the cupboards, walls and / or soffits.
