## 36" SEALED BURNER RANGETOP - 6 BURNERS

WOLF

SRT366

### FEATURES

Maintain control with six dual-stacked burners that go from 20,000 Btu down to a mere breath of flame

Simmer and melt sauces, soups, and marinades easily with the lower tier of the dual-stacked burner

Match other Sub-Zero, Wolf, and Cove products with heavy-gauge stainless steel and signature red infinite control knobs

Cleanup is a snap as sealed, seamless burner pans contain splashes and spills

Move pots and pans effortlessly across the continuous cast-iron grates

Reignites flame automatically with spark ignition system

### ACCESSORIES

2-Burner Wok Grate

Black Knobs

Filler Trim

Red Knobs

S-Grates

Stainless Steel Knobs

Stainless steel, brass or chrome bezels

High altitude conversion kits available

5" and 10" stainless steel risers, and 20" riser with shelf

Accessories available through an authorized dealer.

For local dealer information, visit [subzero-wolf.com/locator](http://subzero-wolf.com/locator).

# 36" DESIGNER OVER-AND-UNDER REFRIGERATOR/FREEZER WITH ICE MAKER - PANEL READY

SUB-ZERO

IT-36CI

## FEATURES

- Monitor and control remotely with Wi-Fi connectivity
- Accepts custom panels for an integrated look within cabinetry or stainless-steel accessory panels and handles to match other Sub-Zero, Wolf, and Cove products
- Preserves frozen foods with frigid, dry air
- Controls temperature within one degree of setpoint
- Locks in cold air with a magnetic door seal system
- Fight spoilage and odors with a NASA-inspired air purification system
- Filters water and ice, removing contaminants, chlorine taste, and odor
- Yields ice automatically and "max ice" for additional production
- Keeps produce fresher with high-humidity, sealed crisper and deli drawers
- Refer to freshness cards for tips on food preservation, use, and care
- Promotes easy clean-up with Nano-coated, spill-proof shelves
- Control brightness with soft-on LED lighting

## ACCESSORIES

- Air Purification Cartridge
- Egg Container
- Reduced Toe Kick Divider
- Stainless Steel Side Panel
- Stainless Steel Top Panel
- Water Filter
- Stainless Steel Tubular Handles
- Stainless Steel Pro Handles
- Dual Installation Kits
- Stainless Steel Door Panels With Pro Handle
- Stainless Steel Door Panels With Tubular Handle
- Stainless Steel Drawer Panels With Pro Handles
- Stainless Steel Drawer Panels With Tubular Handles
- Stainless Steel Dual Installation Kickplates

Accessories are available through an authorized dealer.  
For local dealer information, visit [subzero-wolf.com/locator](http://subzero-wolf.com/locator).

Single Model: IT-36CI

For designer models, custom door panels and handle hardware must be provided.

The thickness of the custom panel can vary. A minimum 5/8" (16) thick panel is required, but the thickness can be increased provided it does not exceed the weight limit.

The depth of each designer model is 24" (610). Allow for panel thickness when planning the finished opening depth.

D-style handles are recommended. Door handles must be located near the edge of the panel opposite the hinge and should be centered top to bottom.

Typical panel dimensions are based on an 84" (2134) finished height for column and tall models and 1/8" (3) reveals. Panel dimensions must be adjusted accordingly for all other installations. Finish all sides of custom panels. They will be visible when the door/drawer is open.

Stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer.

Drawer handles must be located near the top edge of each panel.

### Minimum Panel Thickness

5/8"

### Standard Handle Lengths (Optional)

| HANDLE         | TUBULAR | PRO     |
|----------------|---------|---------|
| IT-36CI Door   | 33 1/4" | 31 1/2" |
| IT-36CI Drawer | 33 1/4" | 31 1/2" |

### Door Panel Height

Typical panel dimensions are based on an 84" (2134) finished height for column and tall models and 34 1/2" (876) for drawer models, with a 4" (102) toe kick and 1/8" (3) reveals. Panel dimensions must be adjusted accordingly for all other installations.

The height of the custom door panel can extend beyond the typical panel height, provided it does not exceed the weight limit.

Upper valance—column and tall (side view).

### Toe Kick Clearance

The height of the toe kick area can extend beyond the typical toe kick height, provided it does not exceed the dimensions in the illustration below. Toe kick heights from 2" (51) to 3 7/8" (98) require a reduced toe kick accessory available through an authorized Sub-Zero dealer.

Toe kick (side view).

### PREPARING ELECTRICAL WIRING

- Operate this appliance with the correct voltage as shown in your User Manual and on the rating plate. Connect it to a dedicated, properly grounded branch circuit which is protected by a time delay fuse. Connect the appliance using 3-wires, including a ground wire.
- If an outlet and other power connector are used, it should be in an accessible location adjacent to and not behind the dishwasher and within 4 ft. of the dishwasher's side.
- The wiring must be grounded properly. If in doubt, have it checked by a qualified electrician. Do not connect any other appliance to the same outlet.
- Route the wiring.
- Make sure the electrical cable is oriented in the right side channel.

### WARNING

- For personal safety, remove house fuse or open circuit breaker before installation.
- Do not use an extension cable or adapter with this dishwasher.
- If you find any damage to the dishwasher, contact your retailer or contractor.

### PREPARING CABINET OPENING

- This dishwasher is designed to fit a standard dishwasher opening. An opening may be needed on both sides to route plumbing and electrical connections.
- Select a location as close to the sink as possible for easy connections to water and drain lines.
- To ensure proper drainage, install the dishwasher no more than 12 ft. from the sink.
- If installing the dishwasher in a corner, leave a minimum of 2" between the dishwasher and the adjacent wall.
- To allow for proper clearance of plumbing and electrical, use the template included with the literature to determine the clearance on the side of the cabinet where the cabinet meets the back wall. Using a 2 1/2" diameter hole saw, drill a hole in the target area as shown on the template.

### WARNING

Don't use existing holes unless they are in the target area. Otherwise, the water supply and drain hose may be damaged by being crushed or kinked.

### CAUTION

Failure to properly locate the hole for the water and drain lines may prevent the dishwasher from installing flush with the cabinets and could result in kinked or damaged lines. Installation damage is not covered by the warranty, and leaks caused by improper installation may result in property damage.

### PREPARING WATER SUPPLY CONNECTION

- Make sure the house water supply is turned off before connecting the dishwasher water lines.
- Connect the dishwasher to a hot water supply with a temperature range between 120 °F (49 °C) and 149 °F (65 °C). This temperature range provides the best washing results and shortest cycle time. To prevent damage to dishes, the temperature should not exceed 149 °F (65 °C).
- When connecting the dishwasher water line, sealing tape or compound should be used on pipe threads to avoid leaks. Tape or compound should not be used on compression fittings.
- The water supply tube must be located in the left side channel.

### NOTE

Use new hoses when connecting to the water supply. Do not reuse old hoses.

DO30PM/S/PH

## FEATURES

Cook for a crowd, with two ovens and twice the capacity

Preheats faster and cooks more consistently across all racks due to its advanced Dual VertiCross™ convection system

Assures predictably delicious results with a variety of modes, including Convection Roast, Proof, and Dehydrate

Prepares 50 popular dishes with the Gourmet feature that automatically adjusts cook times and temperatures

Handles multiple dishes simultaneously with our largest capacity oven (13 percent larger)

Insert a temperature probe to tell you exactly when it is done—and in gourmet mode, it will alert you the moment the dish is ready

Uncomplicate cooking with innovative, interactive color touchscreen controls

Makes a statement with Wolf's iconic red control knobs

Integrates beautifully into surrounding cabinetry with flush installation

Ensures excellent visibility via three bright halogen lights and large, triple-panel-glass door windows

Master your technique with tips and recipes from the Mastering the M series oven guide

**⚠ WARNING**

- Certain internal parts are intentionally not grounded and may present a risk of electric shock only during servicing. Service personnel- Do not contact the following parts while the appliance is energized: pump, valve, motor, control board.

**Tools Needed**

- ① Pliers
- ② Flat-Blade Screwdriver
- ③ Level

**Choosing the Proper Location**

Check the following requirements for the install location before installing the washer.

- Allow for sufficient space between the walls and the washer for installation.
- Make sure that the floor is clean, dry and free of dust, dirt, water and oil so the leveling feet cannot slide easily. Leveling feet that can move or slide on the floor can contribute to excess vibration and noise.
- If the floor has too much flex, reinforce it to make it more rigid. If the floor is not solid, it may cause severe vibration and noise.
- If a drain pan must be used, take extra care to follow the instructions provided with the drain pan and make sure the leveling feet are adjusted for firm and even contact with the pan. Use of drain pans and failure to properly level the washer may result in increased vibration and noise during operation.

**Power Outlet**

- The power outlet must be within **60 inches (1.5 m)** of either side of the washer.
- Position the washer so that the outlet and plug are easily accessible.
- Do not overload the outlet with more than one appliance.
- The outlet must be grounded in accordance with current electrical wiring codes and regulations.
- Use a time-delay fuse or circuit breaker.

- It is the personal responsibility and obligation of the washer owner to have a proper outlet installed by a qualified electrician.

**Flooring**

- To minimize noise and vibration, install the washer on a level, solidly constructed floor capable of supporting the washer without flexing or bouncing.
- The washer must be installed on firm flooring to minimize vibration during the spin cycle. Concrete flooring is best, but a wood floor is sufficient, provided it is built to FHA standards.
- The floor under the washer must not slope more than 1 inch (2.5 cm) from front to back or side to side.
- Installing on carpeting and soft tile surfaces is not recommended.
- Never install the washer on a platform or weakly supported structure.

**Floor Installation**

To ensure sufficient clearance for water inlet hoses, drain hose and airflow, allow minimum clearances of at least **1 inch (2.5 cm)** at the sides and **4 inches (10 cm)** behind the washer. Be sure to allow for wall, door, or floor moldings that may increase the required clearances.

| Dimensions and Clearances |                    |
|---------------------------|--------------------|
| A                         | 24 3/4" (62.6 cm)  |
| B                         | 57 3/4" (146.6 cm) |
| C                         | 33 1/4" (84 cm)    |
| D                         | 4" (10 cm)         |
| E                         | 1" (2.5 cm)        |

| Dimensions and Clearances |               |
|---------------------------|---------------|
| F                         | 27" (70 cm)   |
| G                         | 1/4" (0.5 cm) |

### Stacking or Pedestal Installation

The washer can be stacked under a dryer or on top of a pedestal or pedestal washer.

| Dimensions and Clearances |                    |
|---------------------------|--------------------|
| A                         | 33 1/4" (84 cm)    |
| B                         | 4" (10 cm)         |
| C                         | 1" (0.5 cm)        |
| D                         | 27" (70 cm)        |
| E                         | 77 1/2" (196.8 cm) |
| F                         | 1/4" (0.5 cm)      |

### NOTE

- Refer to the instructions packaged with the optional pedestal kit before stacking appliance on pedestal.
- Do not use a drain pan with a pedestal or pedestal washer installation as it can block the drawer. Using a drain pan may result in increased vibration and noise during operation.

## Unpacking and Removing Shipping Material

Remove all shipping materials from the washer for proper operation and inspect it for shipping damage.

### CAUTION

- Failure to remove shipping materials can cause excessive noise and vibration.

## Unpacking Shipping Material

\* This feature is only available on some models.

Lift the washer off the foam base.

- After removing the carton and shipping material, lift the washer off the foam base.
- Make sure the plastic drum support ①\* comes off with the base and is not stuck to the bottom of the washer.
- If you must lay the washer down to remove the carton base ②, always protect the side of the washer and lay it carefully on its side. Do not lay the washer on its front or back.

## Removing Shipping Material

- Remove the bolt assemblies.
  - Starting with the bottom two shipping bolts ③, use the included wrench to fully loosen all 4 shipping bolts by turning them counterclockwise.
  - Remove the bolt assemblies (bolts and retainers) by wiggling them slightly while pulling them out.

- Install the hole caps.

- Locate the hole caps ④ included in the accessory pack or attached to the back of

## Clearances

### Installation Spacing for Recessed Area or Closet Installation

The following clearances are recommended for this dryer. This dryer has been tested for clearances of 1 inch (2.5 cm) on the sides and rear. Recommended clearances should be considered for the following reasons:

- Additional clearances should be considered for ease of installation and servicing.
- Additional clearances should be considered on all sides of the dryer to reduce noise transfer. For closet installation, with a door, minimum ventilation openings in the top and bottom of the door are required. Louvered doors with equivalent ventilation openings are acceptable.

#### Closet Ventilation Requirements

Closets with doors must have both an upper and lower vent to prevent heat and moisture buildup in the closet. One upper vent opening with a minimum opening of 48 sq. in. (310 cm²) must be installed no lower than 6 feet above the floor. One lower vent opening with a minimum opening of 24 sq. in. (155 cm²) must be installed no more than one foot above the floor. Install vent grills in the door or cut down the door at the top and bottom to form openings. Louvered doors with equivalent ventilation openings are also acceptable.

#### NOTE

- There should be at least a little space around the dryer (or any other appliance) to eliminate the transfer of vibration from one appliance to another. If there is enough vibration, it could cause appliances to make noise or come into contact, causing paint damage and further increasing noise.

## Installation Spacing for Recessed Area or Closet, with Stacked Washer and Dryer

\* Required spacing

\*\* For side or bottom venting, 2-inch (5.1 cm) of spacing is allowed.

## Installation Spacing for Cabinet

For cabinet installation with a door, minimum ventilation openings in the top of the cabinet are required.

\* Required spacing

## Installation Location Requirements

### WARNING

- Read all installation instructions completely before installing and operating your dryer! It is important that you review this entire manual before installing and using your dryer. Detailed instructions concerning electrical connections, gas connections, and exhaust requirements are provided on the following pages.

ENGLISH

The installation requires:

- A location that allows for proper exhaust installation. A gas dryer must be exhausted to the outdoors. See Venting the Dryer.
- A grounded electrical outlet located within 2 ft. (61 cm) of either side of the dryer. See Connecting Electric Dryers.
- A sturdy floor to support the total dryer weight of 200 lb (90.7 kg). The combined weight of a companion appliance should also be considered.
- No other fuel-burning appliance can be installed in the same closet as a dryer.
- Additional clearances might be required for wall, door and floor moldings.
- Companion appliance spacing should also be considered.

### NOTE

- The floor must be level, with a maximum slope of 1 inch (2.5 cm) under the entire dryer. Clothes may not tumble properly, and automatic sensor cycles may not operate correctly if the dryer is not level.
- For garage installation, you will need to place the dryer at least 18 inches (45.7 cm) above the floor. The standard pedestal height is 15 inches (38 cm). You will need 18 inches (45.7 cm) from the garage floor to the bottom of the dryer.
- Do not operate your dryer at temperatures below 45 °F (7 °C). At lower temperatures, the dryer might not shut off at the end of an automatic cycle. This can result in longer drying times.
- The dryer must not be installed or stored in an area where it will be exposed to water and/or weather.
- Check code requirements that limit, or do not permit, installation of the dryer in garages, closets, mobile homes or sleeping quarters. Contact your local building inspector.

## Venting the Dryer

### ⚠ WARNING

To reduce the risk of fire or explosion, electric shock, property damage, injury to persons or death when using this appliance, follow basic safety precautions, including the following:

- Do not crush or collapse ductwork.
- Do not allow ductwork to rest on or contact sharp objects.
- If connecting to existing ductwork, make sure it is suitable and clean before installing the dryer.
- Venting must conform to local building codes.
- Gas dryers **MUST** exhaust to the outdoors.
- Use only 4-inch (10.2 cm) rigid, semi-rigid or flexible metal ductwork inside the dryer cabinet and for venting outside.
- To reduce the risk of fire, combustion, or accumulation of combustible gases, **DO NOT** exhaust dryer air into an enclosed and unventilated area, such as an attic, wall, ceiling, crawl space, chimney, gas vent, or concealed space of a building.
- To reduce the risk of fire, **DO NOT** exhaust the dryer with plastic or thin foil ducting.
- The exhaust duct must be 4-inch (10.2 cm) in diameter with no obstructions. The exhaust duct should be kept as short as possible. Make sure to clean any old ducts before installing your new dryer.
- Rigid, semi-rigid or flexible metal ducting is recommended for use between the dryer and the wall. All non-rigid metal transition duct must be UL-listed. Use of other materials for transition duct could affect drying time.
- **DO NOT** use sheet metal screws or other fasteners which extend into the duct that could catch lint and reduce the efficiency of the exhaust system. Secure all joints with duct tape.
- Do not exceed the recommended duct length limitations noted in the chart. Failure to follow these instructions may result in extended drying times, fire or death.

### ⚠ WARNING

- Ductwork is not provided with the dryer. You should obtain the necessary ductwork locally. The vent hood should have hinged dampers to prevent backdraft when the dryer is not in use.
- The total length of flexible metal duct must not exceed 8 ft. (2.4 m).

## Ductwork

| Wall Cap Type                                                                                                                                                                             | Number of 90° Elbows | Maximum length of 4-inch diameter rigid metal duct |

### NOTE

- Deduct 6 ft. (1.8 m) for each additional elbow. Do not use more than four 90° elbows.
- In Canada, only those foil-type flexible ducts, if any, specifically identified for use with the appliance by the manufacturer should be used. In the United States, only those foil-type flexible ducts, if any, specifically identified for use with the appliance by the manufacturer and that comply with the Outline for Clothes Dryer Transition Duct, Subject 2158A, should be used.

## Routing and Connecting Ductwork

### NOTE

Follow the guidelines below to maximize drying performance and reduce lint buildup and condensation in the ductwork. Ductwork and fittings are NOT included and must be purchased separately.

- Use 4-inch (10.2 cm) diameter rigid, semi-rigid or flexible metal ductwork.
- The exhaust duct run should be as short as possible.
- Use as few elbow joints as possible.
- The male end of each section of exhaust duct must point away from the dryer.
- Use duct tape on all duct joints.
- Insulate ductwork that runs through unheated areas in order to reduce condensation and lint buildup on duct surfaces.
- Incorrect or inadequate exhaust systems are not covered by the dryer warranty. Dryer failures or service required because of such exhaust systems will not be covered by the dryer warranty.
