AIRFLOW VENTING RECOMMENDATIONS

CLOSED SOFFIT CABINET

- Depth of cabinet must be less than 25" (63.5 cm).
- Height of soffit must not exceed 84" (213.3 cm).
- Following illustrations explain the cabinet construction (soffit and rear wall positions) required for optimum ventilation and airflow.

Top View

Front View

Grey arrow = ambient air; Black arrow = warm air

Cabinet depth 25" and soffit located at 84", provides proper airflow/ventilation to the refrigerator. Efficient cooling is achieved.

Cabinet depth more than 25" and/or soffit located at more than 84", causes air gap at back and/or top of the refrigerator. Air gap allows warm air recirculation causing loss in cooling efficiency.

- If your opening does not meet these requirements, you will need to make modifications.

Plan the Installation

Plan your installation using these instructions in conjunction with the Installation Instructions provided with the refrigerator. Modifications must be made to the refrigerator to accommodate the armoire cabinet.

Required parts

- One of the following built-in refrigerator models:
Side-by-Side: JS42NFXFDW, JS42NFXFDE, JS48NFXFDE, JS48NFXFDW
36" Bottom Mount: JB36NFXFLW, JB36NFXFRW, JB36NFXFLE, JB36NFXFRE
36" French Door Bottom Mount: JF36NFXFDE
42" French Door Bottom Mount: JF42NFXFDW, JF42NFXFDE
- Accessory Armoire-Style Door Panel Kit which includes (Grille Assembly and Grille Bracket Assembly)
- Custom Panels

Opening Requirements

IMPORTANT:

- An Armoire installation requires an open soffit. For a fully integrated installation, a minimum of 6" (15.24 cm) of open space above the refrigerator is required. The open space must also extend the width and depth of the unit. See "Fully Integrated Installation." Anti-tip boards are required. See "Install Anti-Tip Boards" in the Installation Instructions provided with the refrigerator for more information.
- The width of the opening, from side to side, must be as specified for your model, for at least 3" (7.62 cm) back from the face of the cabinet. If your opening does not meet this requirement, you will need to make modifications.
- The depth of the opening from the front of the cabinet to the back wall must be 25" (63.5 cm) minimum to achieve a flush installation.
- A grounded 3 prong electrical outlet should be placed within 4" (10.2 cm) of the right side cabinets or end panel. See "Electrical Requirements" in the Installation Instructions provided with the refrigerator.
- The water shutoff should be located in the base cabinets on either side of the refrigerator or some other easily accessible area. If the water shutoff valve is not in the cabinets, the plumbing for the water line can come through the floor. See "Water Supply Requirements" in the Installation Instructions provided with the refrigerator.

Airflow Venting Requirements

IMPORTANT:

- Armoire style installations require a minimum of 6" (15.24 cm) of open space above the refrigerator. This space must not be blocked in any way, including soffits.
- Models may be installed using either Option 1 or Option 2.

Option 1 - Open to Ceiling (all models)

Option 2 - False Front (cabinet face only) (all models)

Custom Overlay Panels

Custom overlay panels allow you to blend the exterior of your refrigerator into the overall kitchen décor and to use custom handles for additional design flexibility.

In some cases, your cabinet manufacturer may choose to work with one panel routed for the different dimensions. Follow these panel dimension and placement instructions to be sure that the custom overlay panels will fit properly.

IMPORTANT:

- This installation does not require filler or backer panels.
- The required thickness for all panels is $\frac{3}{4}$ " (1.91 cm).

Bottom Mount

- For 36" (91.4 cm) Single-door Bottom Mount models, the weight of the refrigerator door overlay panel cannot exceed 60 lbs (27.2 kg) and the freezer drawer overlay panel cannot exceed 25 lbs (11.3 kg).
- For 36" (91.4 cm) or 42" (106.7 cm) French Door models, the weight of each refrigerator door cannot exceed 38 lbs (17.2 kg) and the freezer drawer overlay panel cannot exceed 30 lbs (13.6 kg).
- For all models, the weight at the top grille overlay panel cannot exceed 7 lbs (3.2 kg).

Side-by-Side

- The weight of the refrigerator door overlay panel cannot exceed 66 lbs (29.9 kg) for 48" models or 65 lbs (29.5 kg) for 42" models.
- The weight of the freezer door overlay panel cannot exceed 50 lbs (23 kg) for 48" models or 49 lbs (22.2 kg) for 42" models.
- The weight of the top grille overlay panel cannot exceed 8 lbs (3.6 kg) for 48" models or 7 lbs (3.2 kg) for 42" models.

CAUTION

Pinch Hazard

Installation of door panels with less than a $\frac{3}{8}$ " (0.95 cm) gap between the door panel and the adjacent cabinet increases the risk of potential pinching.

Prepare Custom Wood Door Panels

IMPORTANT: For an armoire installation, instead of drilling holes along the top edge(s) of the custom door panel(s), you must adjust the placement of the drilling template (provided with the refrigerator).

NOTES:

- No template adjustment is needed for the bottom edge of the door panel(s).
 - No template adjustment is needed for the custom freezer drawer panel.
1. Align the drilling template on the back of the custom refrigerator door panel so that the top of the template is offset $6\frac{3}{4}$ " (17.2 cm) from the top of the refrigerator door panel.

NOTE: The only offset dimension is the $6\frac{3}{4}$ " (17.2 cm) offset from the top of the door panel.

Custom Overlay Panel

NOTE: For standard stainless steel or glass door models, skip these instructions and go to "Electrical Requirements" section.

If you plan to install a custom overlay panel, you will need to create the panel yourself or consult a qualified cabinetmaker or carpenter. Refer dimension drawings for panel specifications.

IMPORTANT:

- The thickness of the overlay panel must be 3/4" (19 mm).
- Custom solid door overlay panel must not weigh more than 20 lb (9.07 kg).
- Custom glass door overlay panel must not weigh more than 10 lb (4.54 kg).
- Overlay panels weighing more than recommended may cause damage to your appliance.

Solid door overlay panel - Preparation:

Create the custom overlay panel using the dimensions shown in the illustration "Solid door overlay panel and hinge routing dimensions". Rout shaded areas to a 1/2" (12 mm) depth as shown.

IMPORTANT: The following graphic shows a custom panel for a door with the hinges installed on the right-hand side. If your refrigerator has the hinges installed on the left-hand side, rotate the custom frame 180° so the hinge markings will be on the left.

- Dispose of and/or recycle all packaging materials.
- After all packaging materials have been removed, clean the inside of your refrigerator. Refer the cleaning instructions in "Cleaning" section.

Important information to know about glass shelves and covers:

Do not clean glass shelves or covers with warm water when they are cold. Shelves and covers may break if exposed to sudden temperature changes or impact, such as bumping. Tempered glass is designed to shatter into many small, pebble-size pieces. This is normal. Glass shelves and covers are heavy. Use both hands when removing them to avoid dropping.

NOTE: For standard stainless steel or glass door models, skip to "Door Closing" section.
