DWHD650WFP
EMERALD® 6-PROGRAM DISHWASHER
PROFESSIONAL SERIES HANDLE

Thermador 

Also Available In:
DWHD650WFM – Flat Stainless Steel Panel with
Masterpiece® Series Handle
DWHD650WPR – Custom Panel

FEATURES & BENEFITS

- Chef's Tool Drawer (3rd Rack) is designed to make loading and unloading tools and hard to place items extraordinarily easier
- Sens-A-Wash® measures water cleanliness and adjusts wash cycle
- Three stage advanced filtration recirculates water for sparkling results
- 3-Level adjustable upper rack is customizable for all of your needs, designed to be raised for extra large items placed on the bottom rack, or lowered to fit taller wine glasses on the upper rack
- Extra Dry Option adds extra heat to the final rinse to enhance drying results
- Impressively Quiet®—48 dBA for peaceful kitchen experience
- Thermador Connected Experience by Home Connect brings exclusive dish features that keep you connected. Always.

HANDLES

Choose between two options:

or

HEATRKIT20 - 13W @ 120V
Freedom® Heater Kit

When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this sealing kit is included. For all other (non-traditional, i.e. two wine columns, two bottom freezers, etc.) side-by-side combinations or instances where any appliances are installed less than 6-inches (152 mm) apart from one another but not connected side-by-side, purchase this kit. This kit is recommended for use with any installation in areas that are subject to humidity, or located next to an outside wall.

STORAGE

FRAMEKIT10

Freedom® Frame Kit

For any custom column installation in 24-inch deep cutouts. With two metal side trims whose placement between the interior cutout wall and the appliance helps overcome the challenge of unfinished cabinet returns.

FILTERS

Choosing the Proper Location

Install the washer on a solid floor that is strong and rigid enough to support the weight of the washer, even when fully loaded, without flexing or bouncing. If the floor has too much flex, you may need to reinforce it to make it more rigid. If the floor is not solid, it may cause severe vibration and noise.

NOTE

- Before installing the washer, make sure the floor is clean, dry and free of dust, dirt, water and oil so the washer feet cannot slide easily. Leveling feet that can move or slide on the floor can contribute to excess vibration and noise due to poor contact with the floor.
- If a drip pan must be used, take extra care to follow the instructions provided with the drip pan and make sure the leveling feet are adjusted for firm and even contact with the pan. Use of drip pans and failure to properly level the machine may result in increased vibration and noise during operation.
- Allow for sufficient space between the walls and the washer for installation.

Power Outlet

- The power outlet must be within 60 inches (1.5 m) of either side of the washer.
- The appliance and outlet must be positioned so that the plug is easily accessible.
- Do not overload the outlet with more than one appliance.
- The outlet must be grounded in accordance with current electrical wiring codes and regulations.
- Use a time-delay fuse or circuit breaker.

NOTE

- It is the personal responsibility and obligation of the product owner to have a proper outlet installed by qualified service personnel.

Flooring

- To minimize noise and vibration, the washer must be installed on a solidly constructed floor.
- Allowable slope under the entire washer is a maximum 1 inch (2.5 cm) difference from side to side or from front to back.
- Installing on carpeting and soft tile surfaces is not recommended.
- Never install the washer on a platform or weakly supported structure.

NOTE

- The washer must be installed on firm flooring to minimize vibration during the spin cycle. Concrete flooring is best, but a wood floor is sufficient, provided it is built to FHA standards.

Floor Installation

To ensure sufficient clearance for water lines, the drain line and airflow, allow minimum clearances of at least 1 inch (2.5 cm) at the sides and 4 inches (10 cm) behind the unit. Be sure to allow for wall, door, or floor moldings that may increase the required clearances.

Stacked or Pedestal Installation

NOTE

- Refer to the instructions packaged with the optional pedestal kit before installing with a pedestal kit.
- Do not use a drip pan with a pedestal or pedestal washer installation as it can block the drawer. Using a drip pan may result in increased vibration and noise during operation.

NOTE

Model numbers can be found on the cabinet inside the door.

12 INSTALLATION

Clearances

Installation Spacing for Recessed Area or Closet Installation

The following clearances are recommended for this dryer. This dryer has been tested for clearances of 1 inch (2.5 cm) on the sides and rear. Recommended clearances should be considered for the following reasons:

- Additional clearances should be considered for ease of installation and servicing.
- Additional clearances should be considered on all sides of the dryer to reduce noise transfer. For closet installation, with a door, minimum ventilation openings in the top and bottom of the door are required. Louvered doors with equivalent ventilation openings are acceptable.

Closet Ventilation Requirements

Closets with doors must have both an upper and lower vent to prevent heat and moisture buildup in the closet. One upper vent opening with a minimum opening of 48 sq. in. (310 cm²) must be installed no lower than 6 feet above the floor. One lower vent opening with a minimum opening of 24 sq. in. (155 cm²) must be installed no more than one foot above the floor. Install vent grills in the door or cut down the door at the top and bottom to form openings. Louvered doors with equivalent ventilation openings are also acceptable.

NOTE

- There should be at least a little space around the dryer (or any other appliance) to eliminate the transfer of vibration from one appliance to another. If there is enough vibration, it could cause appliances to make noise or come into contact, causing paint damage and further increasing noise.

Installation Spacing for Recessed Area or Closet, with Stacked Washer and Dryer

* Required spacing

** For side or bottom venting, 2-inch (5.1 cm) of spacing is allowed.

Installation Spacing for Cabinet

For cabinet installation with a door, minimum ventilation openings in the top of the cabinet are required.

* Required spacing

SAXONY

SPRBC056D1SS

Silhouette
PROFESSIONAL
www.silhouetteappliances.com

BENEFITS

Model #	SPRBC056D1SS
Capacity-Wine Compartment	Stores up 126 beverage cans and 6 bottles of wine
Volume	5.6 cu. ft.
Temperature Range	34F – 50F (1C-10C)
Noise	39 db
Door Frame	304 grade seamless stainless steel
Cabinet	Matte black textured steel
Interior Finish	Matte black
Door Style	Single door
Reversible Door Swing	Yes
Door Hinge	Hidden for flush fit installation
Door Glass	Low E, dual pane argon filled
Door Handle	Pro-style, 20% longer than previous model
Door Lock	Yes
Shelving Material	3 adjustable clear glass shelves
Lighting Option 1	On/Off with door opening
Lighting Option 2	On 100% illumination for 2 hours
Lighting Option 3	On 50% illumination for 2 hours
Light Colours	Choose between Arctic white or Azure blue
Controls	Digital seamless capacitive touch
Temperature Recall	Yes reverts to last set temperature after power outage
Alarm	Yes, temperature and door ajar
Sabbath Mode	Yes

INSTALLATION INSTRUCTIONS

PREPARING THE ENCLOSURE

Gloves and safety goggles should be worn during installation.

It is not recommended to install the appliance into a corner or directly beside a wall. The door will need to be opened more than 90° to allow full extension of the shelves. If it is necessary to place the unit next to a wall or in a corner, leave at least 2-4 inches (5-10 cm) of space between the wall and the appliance to allow for the door opening.

The cabinet opening must be at least 24 inches (61 cm) wide by 35 inches (88.9 cm) high by 25 inches (63.5 cm) deep.

Note: The listed depth requirement is assuming that the electrical outlet is located in the adjacent cabinetry or flush mounted in the rear wall, not surface mounted inside the enclosure.

If the electrical outlet is located inside adjacent cabinetry, cut a 1.5 inch (3.8 cm) diameter hole to admit the power cord. If the cabinet wall is metal, the hole edge must be covered with a bushing or grommet.

REQUIRED TOOLS

- Safety goggles
- Gloves
- Tape measure
- Carpenter square
- Level
- Flashlight
- Electric drill with hole bit

VCIN36GWS
36-INCH CUSTOM INSERT
PROFESSIONAL® SERIES

Thermador★

Home Connect

FEATURES & BENEFITS

- Revel in creative freedom with Professional® Series custom inserts that can blend in with cabinetry or make a bold statement
- ★ Equipped with the Thermador Connected Experience by Home Connect™
- Powerfully Quiet® system accepts integral, inline, and remote blowers
- Beautiful illumination with multi-level, vivid LED lights
- Features automatic mode, delay shut-off, and check filter light

ACCESSORIES (OPTIONAL)

25 ft. Blower Connector Cable - EXTNCB25W

For use with the following inline and remote blowers: VTR630W, VTR1030W, VTR1330W, VTI610W, VTI1010W

Roofplates

RFPLT600P - For use with 600 CFM remote blower VTR630W

RFPLT1000P - For use with 1000 CFM remote blower VTR1030W and 1300 CFM blower VTR1330W

VCIN Trim Notes

NOTE: VCIN_GWS series custom insert models include hood trim pieces to complete the installation.

Remote Control Panel

REMCPUW - Ability to vertically install on cabinetry or wall to control hood in a convenient location
