PV-34 April 1,2021 E) fam

ELECTRICAL REQUIREMENTS

AWARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

115 V, 60 Hz, AC only, 15 A or 20 A fused, grounded circuit is required. A dedicated circuit is recommended. Use an outlet that cannot be turned off by a switch. Minimum length of power cord is 60° (152.0 cm). Do not use an extension cord.

WATER PRESSURE REQUIREMENTS

A cold water supply with water pressure between 30 psi and 120 psi (207 kPa and 827 kPa) is required to operate the ice maker. Call a licensed, qualified plumber with any questions about the water pressure.

Reverse Osmosis Water Supply

IMPORTANT: The pressure of the water coming out of a reverse osm osis system going to the water inlet valve of the refrigerator needs to be between 30 psi and 120 psi (207 kPa and 827 kPa).

If a reverse osmosis water filtration system is connected to the cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 psi to 60 psi (276 kPa to 414 kPa).

LOCATION REQUIREMENTS

AWARNING

Explosion Hazard

Keep flammable materials and vapors, such as gasoline, away from refrigerator.

Failure to do so can result in death, explosion, or fire.

To ensure proper ventilation for your refrigerator, allow for a minimum 3/16" (0.48 cm) of space on each side and 1/4" (0.64 cm) at the top. Allow for a minimum 1" (2.54 cm) space behind the refrigerator

INSTALLATION INSTRUCTIONS

BEFORE USING YOUR APPLIANCE

Remove the exterior and interior packing.

Check to be sure you have all of the following parts:

1	Instruction Manual	
3	Beverage Shelves	
2	Keys	
1 Set	Stainless Steel Hinges for Door Swing Reversal	
2	Hinge Screw caps	
1	Stainless Steel Handle	

Before connecting this appliance to the power source, let it stand upright for approximately 2
hours. This will reduce the possibility of a malfunction in the cooling system from handling
during transportation.

Clean the interior surface with lukewarm water using a soft cloth.

> INSTALLATION OF YOUR APPLIANCE

This appliance is designed to be for free standing installation or built-in (fully recessed).

• Place your appliance on a floor that is strong enough to support it when it is fully loaded. To

level your appliance, adjust the front leveling legs at the bottom of the appliance.

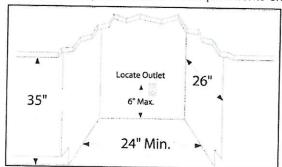

Locate the appliance away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold ambient temperatures may also cause the unit not to perform properly.

Avoid locating the unit in moist areas.

 Plug the appliance into an exclusive, properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized Avanti Products service center.

BUILT - IN CABINET INSTRUCTIONS

This unit is designed for both built-in or free standing installation. If you plan to use this unit in a built-in application please follow the requirements shown to the right.
