Subject: Re: PV-21 Tile Reselection ****URGENT - Response Required****

Hi Chanel,

I'm sorry that we miss understood each other but I would like the 12x24 Mamorea blanco Staturio polished tile like the one picture to be in the master shower. However, I would like for it to be with no pattern but instead just the tile in a horizontal layout on the wall with no pattern.

Thank you

On Aug 4, 2022, at 4:56 PM, Yolande Somerville <ysomerville@goldparkhomes.com> wrote:

Hi Inessa,

Thank you for coming into the décor studio yesterday.

Please provide confirmation that you would like the Entrance, Powder Room, Mud Room, Master Ensuite and Ensuite ¾ **floor tile** to be **12x24 Mamorea 'Bianco Staturio' Polished (shown below)** and you would like the same tile in **Ensuite ¾ shower wall tile**.

For the **Master Ensuite** shower wall tile yesterday afternoon, you mentioned you wanted this **style** tile to be used but, in the same color (grey) as the floor tile.

Please confirm if this is correct or if you would like the same tile on the floor to be used on the Master Ensuite shower wall.

Thank you,
Chanel

Hi Inessa,

On your original color scheme, I have **ART style** selected.

Yesterday afternoon you mentioned you would like the **CULT style**.

Could you please confirm which shower wall tile **style** you would like us to request?

INSTALLATION REQUIREMENTS

These installation instructions cover different models. The appearance of your particular model may differ slightly from the illustrations in these Installation Instructions.

Tools and Parts

Gather the required tools and parts before starting installation. Read and follow the instructions provided with any tools listed here.

Tools needed

- Tape measure
- 1/8" (3.17 mm) drill bit
- #2 Phillips screwdriver
- Marker or pencil
- Drill

Parts supplied

The Microwave Drawer is preassembled.

- 1" (2.5 cm) mounting screws (4)

Verification needed

- Installer must confirm presence of anti tip block. Refer to the anti-tip block section in the manual.
- Check local codes. Check existing electrical supply. See "Electrical Requirements".
- It is required that all electrical connections be made by a licensed, qualified electrical installer.

Location Requirements

This product is suitable for use below electric or gas built-in ovens. This product is not suitable for use below cooktops. The Microwave Drawer may be located in a cabinet or below the counter, and/or below a built-in oven. Check the opening where the Microwave Drawer will be installed. The location must provide:

IMPORTANT: Observe all governing codes and ordinances.

- Wood cabinetry.
- Cutout opening that is plumb and square. See "Minimum Cutout Dimensions" in the "Minimum Dimensions" section.
- Cutout floor that is solid, level, and flush with bottom of cabinet cutout.
- Support for weight of at least 100 lbs (45.4 kg), which includes Microwave Drawer and items placed inside.
- Grounded electrical outlet. See the "Electrical Requirements" section.
- Minimum installation clearances for installation location. See the "Minimum Dimensions" section.
- Complete enclosure around the recessed portion of the Microwave Drawer.

Minimum Dimensions

Minimum Wall Oven Combination Installation Clearances

For proper installation, the following minimum clearances must exist above and below the cutout opening.

NOTE : Upper oven must have heat deflector kit installed to direct exhaust away from microwave console (Refer to Wall Oven Manual for Deflector Kit Installation)

A. Upper oven cutout
B. Microwave drawer cutout

PV-21
July 13 2021

1.9

Electrical Requirements

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.
Do not remove ground prong.
Do not use an adapter.
Do not use an extension cord.
Failure to follow these instructions can result in death, fire, or electrical shock.

IMPORTANT: Observe all governing codes and ordinances.

Required:

- A 120 V, 60 Hz, AC-only, 15 or 20 A electrical supply with a fuse or circuit breaker.

Recommended:

- A time-delay fuse or time-delay circuit breaker
- A separate circuit serving only this Microwave Drawer

GROUNDING INSTRUCTIONS

- **For all cord connected appliances:**
The microwave oven must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. The microwave oven is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

WARNING: Improper use of the grounding plug can result in a risk of electric shock. Consult a qualified electrician or serviceman if the grounding instructions are not completely understood, or if doubt exists as to whether the microwave oven is properly grounded.

Do not use an extension cord. If the power supply cord is too short, have a qualified electrician or serviceman install an outlet near the microwave oven. A short power supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.

SAVE THESE INSTRUCTIONS

Product Dimensions

The drawer opens $15\frac{1}{4}"$ (38.7 cm).

INSTALLATION INSTRUCTIONS

Install the Anti-Tip Block

⚠ WARNING

Crush Hazard

Microwave drawer can tip and fall out of opening.
Install anti-tip block to wall per installation instructions.
Failure to do so can result in serious injury or burns.

To reduce the risk of tipping of the drawer, the Anti-Tip block must be properly installed located $14\frac{13}{16}$ " (37.6 cm) above the floor on which the Microwave Drawer will sit. If the Microwave Drawer is ever moved to a different location, the Anti-Tip block must also be moved and installed.

1. Measure $14\frac{13}{16}$ " (37.6 cm) from the cutout floor where the Microwave Drawer will sit and mark a line on the wall.
2. Position the bottom of the anti-tip block on the line marked on the wall and attach the anti-tip block to the wall with screws. Make sure the screws are secured to wood or metal studs.

NOTES:

- The anti-tip block is required before installing the Microwave Oven Drawer.
- The anti-tip block is to be provided by the installer.
- When fastening, be sure that the screws do not penetrate electrical wiring or plumbing.

Anti-Tip Block Dimensions.

Using sturdy wood screws (installer to provide), securely install the anti-tip block in the upper-right corner of the cutout, making sure the block is completely stable. The bottom of the block must be $14\frac{13}{16}$ " (37.6 cm) from the cutout floor.

Install the Microwave Drawer

⚠ WARNING

Excessive Weight Hazard

Use two or more people to move and install microwave oven.

Failure to do so can result in back or other injury.

1. Empty Microwave Drawer of any loose contents.
2. Using two or more people, slide Microwave Drawer all the way into the opening, and center the Microwave Drawer.
3. Open the Microwave Drawer, and mark the four holes in the mounting flange.

NOTE: The screw holes in the mounting flange of both sides must be fully over the wood of the wall or cabinet.

4. Remove Microwave Drawer.
5. Using $\frac{1}{8}$ " (3.17 mm) drill, drill four pilot holes into the cabinet through the marks made in Step 3.
6. Prepare the holes by installing a 1" (2.5 cm) screw in and out of each pilot hole.

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these Instructions can result in death, fire, or electrical shock.

7. With the Microwave Drawer near the opening, plug the Microwave Drawer into the grounded 3 prong outlet.
8. Reinsert Microwave Drawer into the opening, open the drawer, and align holes in mounting flange with pilot holes in the cabinet.

A. 1" (2.5 cm) mounting screws (4)

B. Mounting flange screw holes

KitchenAid® French Door Bottom Mount Refrigerator

PRODUCT MODEL NUMBER:

KRFF507H

ELECTRICAL AND WATER REQUIREMENTS:

Electrical: A 115 volt, 60 Hz, AC only 15 or 20 A fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator and approved accessories be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

Water: A cold water supply with water pressure between 35 and 120 psi (241 and 827 kPa) is required to operate the water dispenser and ice maker. If you have questions about your water pressure, call a licensed, qualified plumber.

NOTE: If the water pressure is less than what is required, the flow of water from the water dispenser could decrease or ice cubes could be hollow or irregular shaped.

Reverse Osmosis Water Supply

IMPORTANT: The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 35 and 120 psi (241 and 827 kPa).

If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

PRODUCT DIMENSIONS:

Model Number	KRFF507H
Model Size	27 cu. ft. (764.6 L)
Height - Overall "A"	70 1/4" (178.1 cm)
Height - Top of Cabinet "B"	68 3/4" (174.8 cm)
Depth - Doors Open 90° "C"	48 5/8" (123.5 cm)
Depth - Drawer Open With Handles "D"	54 1/4" (137.8 cm)
Depth - With Handles "E"	36" (91.4 cm)
Depth - Without Handles "F"	33 3/4" (85.7 cm)
Depth - Cabinet Only "G"	29 5/8" (75.2 cm)
Width - Cabinet Only "H"	35 1/8" (90.5 cm)
Width - Doors Open 90° "I"	38 3/4" (97.5 cm)

LOCATION REQUIREMENTS:

To ensure proper ventilation for your refrigerator, allow for a 1/2" (1.25 cm) of space on each side and at the top. Allow for a 1" (2.54 cm) space behind the refrigerator. If your refrigerator has an ice maker, allow extra space at the back for the water line connections. When installing your refrigerator next to a fixed wall, leave a 3 3/4" (9.5 cm) minimum space between the refrigerator and wall to allow the door to swing open.

NOTE: This refrigerator is intended for use in a location where the temperature ranges from a minimum of 55°F (13°C) to a maximum of 110°F (43°C). The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between 60°F (15°C) and 90°F (32°C). It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.

KitchenAid
Model # KDTM604 KPS

PV-Z1

Y. S.

PRODUCT AND CABINET OPENING DIMENSIONS:

- A. Insulation may be compressed (not used on all models).
 B. For panel-ready models, dishwasher depth is $24"$ (61.0 cm), not including the $\frac{3}{4}"$ (1.9 cm) custom door panel.
 C. Door handles may protrude forward of the face of the dishwasher, varies by model.

Check that all surfaces have no protrusions that would prohibit dishwasher installation.

- D. Measured from the lowest point on the underside of the countertop. May be reduced to $33\frac{5}{8}"$ min. (85.4 cm) min. by removing the feet and perforated area of insulation (blanket) on dishwasher.
 E. Minimum, measured from narrowest point of opening.

Important Safety Notice

READ ALL INSTRUCTIONS BEFORE INSTALLING AND OPERATING THIS APPLIANCE

- The installation in this manual is intended for qualified installers, service technicians or persons with similar qualified background. Installation and electrical wiring must be done by qualified professionals and in accordance with all applicable codes and standards, including fire-rated construction.
- DO NOT attempt to install this appliance yourself. Injury could result from installing the unit due to lack of appropriate electrical and technical background.
- Range hood may have very sharp edges; please wear protective gloves if it is necessary to remove any parts for installing, cleaning or servicing.
- Activating any switch ON before completing installation may cause ignition or an explosion.
- Due to the size and weight of this range hood, two people installation is recommended.

TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS:

- For general ventilating use only. DO NOT use to exhaust hazardous or explosive materials and vapors.
- The combustion air flow needed for safe operation of fuel-burning equipment may be affected by this unit's operation. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National

Disclaimer

Carefully inspect all items for damages before accepting delivery. Note any damages on the freight bill or express receipt. Request name and signature of the carrier's agent and keep copy to support your claim. Upon acceptance of items, owner assumes responsibility for its safe arrival. Report damages to the carrier and file a claim immediately. Failure to do so may result in the denial of your claim. The carrier will furnish you with necessary forms for filing a claim.

Damages caused during transit are not covered under our warranty. Please contact us to file an insurance claim.

Please inspect contents of package(s) carefully upon receiving! We must be notified of any damages and/or missing parts within five (5) days upon your receipt of package(s). Claims will not be accepted after five (5) days. NOTE: Items were thoroughly tested and carefully packed in our factory before shipping.

Products must be returned in good working condition with ALL original parts and documentation packed in ALL original cartons, fillers and shipping cartons. A restocking fee of 15% will be charged for all approved return(s). Exchanges or returns may not be accepted if any packaging is missing.

Make sure to inspect the hood for damages and defects before installation. Appearance flaws of the hood found after installation and not affecting hood performance is not covered under our warranty for returns or exchanges. Service visits not covered under warranty will carry a service charge.

Before Installation: Return for exchange or refund (please see above for acceptable returns). After Installation: NO exchange or refund.

purchaser and does not extend to subsequent owners of this product. Any applicable implied warranties, including the warranty of merchantability, are limited in duration to a period of express warranty as provided herein beginning with the date of original purchase at retail and, no warranties, whether express or implied, shall apply to this product thereafter.

To obtain warranty service, you may contact your local reseller from which you purchased this product. Please confirm the terms of your local reseller's policies prior to contacting. Typically, you must include product identification information, including model number and serial number with a detailed description of the problem you are experiencing. You must also include proof of the date of original retail purchase as evidence that the product is within the applicable warranty period.

Fire Protection Association (NFPA), and the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), and the local code authorities.

- Before servicing or cleaning unit, switch power OFF at service panel and lock service panel to prevent power from being switched ON accidentally.
- Clean grease laden surfaces frequently. To reduce the risk of fire and to disperse air properly, make sure to vent air outside. DO NOT vent exhaust into spaces between walls, crawl spaces, ceiling, attics or garages.
- Ducted fans MUST always be vented to the outdoors.
- Use only metal ductwork and this unit MUST be grounded.
- Sufficient air is needed for proper combustion and exhausting of gases through the duct to prevent back drafting.
- When cutting or drilling into wall or ceiling, be careful not to damage electrical wiring or other hid- den utilities.
- All electrical wiring must be properly installed, insulated and grounded.
- Old duct work should be cleaned or replaced if necessary to avoid the possibility of a grease fire.
- Check all joints on duct work to insure proper connection and all joints should be properly taped.
- Use this unit only in the manner intended by the manufacturer. If you have questions, contact the vendor,

TO REDUCE THE RISK OF A STOVE TOP GREASE FIRE:

- Keep all fan, baffle, spaces, filter, grease tunnel, oil container and grease-laden surfaces clean. Grease should not be allowed to accumulate on fan, baffle, spaces, filter, grease tunnel and oil container.
- Always turn range hood ON when cooking at high heat or when cooking flaming foods.
- Use high settings on cooking range only when necessary.
- Never leave surface units unattended at high settings. Boil overs cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings.
- Clean ventilating fan frequently.
- Always use appropriate cookware and utensils size.
- Always use cookware appropriate for the size of the surface element.

TO REDUCE THE RISK OF INJURY TO PERSONS IN THE EVENT OF A STOVE TOP GREASE FIRE:

- **SMOTHER FLAMES** with a close-fitting lid, cookie sheet, or metal tray, then turn OFF the burner. **BE CAREFUL TO PREVENT BURNS. NEVER PICK UP A FLAMING PAN**—you may be burned. **KEEP FLAMMABLE OR COMBUSTIBLE MATERIAL AWAY FROM FLAMES.** If the flames **DO NOT** go out immediately, **EVACUATE AND CALL THE FIRE DEPARTMENT** or dial your local emergency service immediately.
- **DO NOT USE WATER**, including wet dishcloths or towels — a violent steam explosion will result.

Who is Covered

This warranty is extended to the original purchaser for products purchased for ordinary home use.

This Warranty Will Be Voided When:

Product damaged through negligence, improper installation, accident, abuse, misuse, natural disaster, insufficient or excessive electrical supply, abnormal mechanical or environmental conditions, or any unauthorized disassembly, repair, modification, or failure to follow installation instructions. When product is used commercially or other than its intended purpose. Damaged because of improper connection with equipment of other manufacturers. Repaired or modified by anyone other than your local reseller's authorized agents. This limited warranty also does not apply to any product on which the original identification information has been altered, obliterated or removed, has not been handled or packaged correctly or has been sold as second-hand.

What is Not Covered:

Consumable parts such as light bulbs, metal and charcoal filters. The natural wear of finish, and wear due to improper maintenance, use of corrosive and abrasive cleaning products, pads, and oven cleaner products. Chips, dents or cracks due to abuse, misuse, freight damage, or improper installation. Damage of product caused by accident, fire, floods or act of God. The manufacturer and/or distributor/reseller is not liable for, and does not cover under warranty, any loss of properties or any costs associated with removing, servicing, installing, or determining the source of problems with this product.

This warranty is valid in the country of the original purchase at retail. It is non-transferable and applies only to the original

Warranty

TO OBTAIN SERVICE UNDER WARRANTY:

You must present proof of original purchase date.

Please provide an original dated proof of purchase (sales receipt / invoice) in order to obtain service under warranty.

Lifetime Motor Warranty

The motor, which is covered by lifetime warranty, should be provided free of charge by your local reseller given it failed due to manufacturing defects. Subject to the conditions and limitations set forth below, your local reseller should, at its option, either repair or replace it with new or refurbished motor to be functionally equivalent to new. The consumer is responsible for all shipping costs.

One Year Parts Warranty

For one year from the date of original purchase, your local reseller will provide free of charge, non-consumable replacement parts or components that failed due to manufacturing defects. Subject to the conditions and limitations set forth below, your local reseller will, at its option, either repair or replace any part of its products that prove defective by reason of improper workmanship or materials. Repaired parts or replacement products will be provided by your local reseller on an exchange basis, and will be either new or refurbished to be functionally equivalent to new. The consumer is responsible for all shipping costs. Consumable parts not covered by this warranty include but not limited to: Light bulbs, metal, aluminum and charcoal filters.

- Use an extinguisher ONLY if:
- You know you have a Class A, B, C extinguisher, and you already know how to operate it.
- The fire is small and contained in the area where it is started.
- The fire department is being called.
- You can fight the fire with your back to an exit.

TO REDUCE THE RISK OF INJURY TO PERSONS IN THE EVENT OF A GAS LEAKS:

- Extinguish any open flame.
- DO NOT turn on the range hood fan or any type of ventilator.
- DO NOT turn on the lights or any type of appliance.
- Open all doors and windows to disperse the gas. If you still smell gas, call the gas company and fire department, or dial your local emergency service immediately.
- Your safety and the safety of others is very important. We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages. All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

This is the safety alert symbol. This symbol alerts you to potential hazards that can hurt you and others. All safety messages will follow the safety alert symbol and the word "WARNING".

The manufacturer and/or distributor/reseller declines all responsibility in the event of failure to observe the instructions given here for installation, maintenance and suitable use of the product.

The manufacturer and/or distributor/reseller further declines all responsibility for injury due to negligence and the warranty of the unit automatically expires due to improper maintenance.

The manufacturer and/or distributor/reseller will not be held responsible for any damages to personal property or real estate or any bodily injuries whether caused directly or indirectly by the range hood.

Figure 1

Figure 2

Replacing LED Light Fixture

This range hood uses LED light fixture: 3W Max 12V LED

Make sure the range hood is unplugged or turn OFF breaker and the lights are cool to touch.

Place a flat-head screwdriver between light housing and hood body, gently pry up the light housing and search for the metal clip.

Apply force to the metal clip and pull out the light fixture. Disconnect the power cable and discard the old light fixture.

Reverse the steps to install a new halogen light fixture. Turn ON breaker and range hood to test for operation.

- USA/Canada: LED 3W 12V

Make sure the range hood is unplugged or turn OFF breaker.

Make sure the lights are cool to touch, carefully align the arrow on the inner ring with the arrow on the outer ring where it says OPEN. The inner ring will loosen and the light bulb will be available for removal. Install a new halogen light bulb and reverse the steps.

Align arrows on both rings

Replacing the Light Bulb Using the Inner Ring Opener

Make sure the range hood is unplugged or turn OFF breaker

Make sure the lights are cool to touch, carefully align the arrow on the inner ring with the arrow on the outer ring where it says OPEN with the Inner Ring Opener as shown in Figure 1.

The inner ring will loosen and the light bulb will be available for removal as shown in Figure 2.

Install a new light bulb and reverse the steps. Turn ON breaker and range hood to test for operation.

DO NOT allow salt solutions, disinfectants, bleaches, or cleaning compounds to remain in contact with stainless steel for extended periods. Many of these compounds contain chemicals, which may be harmful. Rinse with water after exposure and wipe dry with a clean cloth.

Cleaning Filters

IMPORTANT: Drain oil from oil containers before oil and residue overflow!

The metal filters fitted by the factory are intended to filter out residue and grease from cooking. It need not be replaced on a regular basis but are required to be kept clean.

Filters should be cleaned after every 30 hours of use.

Remove and clean by hand or dishwasher. Spray "Formula 409®" or equivalent degreasing detergent and leave to soak if heavily soiled. Dry filters and re-install before using hood.

Replacing Filters

Should aluminum grease filters wear out due to age and prolonged use, please contact your local reseller for replacement filters. (Note: Also replace damaged filter that has punctured or broken mesh, bent or broken frame.)

Replacing the light bulb

WARNING

Light bulb become extremely hot when turned on. DO NOT touch bulb until switched off and cooled. Touching hot bulbs could cause serious burns.

This range hood uses LED or halogen bulb:

- USA/Canada: Halogen 35W Type GU10 120V (Europe: 220V)

Maintenance

SAFETY WARNING: Never put your hand into area housing the fan while the fan is operating!

For optimal operation, clean range hood and all baffle/spacer/filter/grease tunnel/oil container regularly. Regular care will help preserve the appearance of the range hood.

Cleaning Exterior surfaces

Clean periodically with hot soapy water and clean cotton cloth. Do not use corrosive or abrasive detergent (e.g. Comet Power Scrub®, EZ-Off® oven cleaner), or steel wool/scoring pads, which will scratch and damage the stainless steel surface. For heavier soil use liquid degrease such as "Formula 409®" or "Fantastic®" brand cleaner.

If hood looks splotchy (stainless steel hood), use a stainless steel cleaner to clean the surface of the hood. Avoid getting cleaning solution onto or into the control panel. Follow directions of the stainless steel cleaner. **CAUTION: Do not leave on too long as this may cause damage to hood finish.** Use soft towel to wipe off the cleaning solution, gently rub off any stubborn spots. Use dry soft towel to dry the hood.

After cleaning, you may use non abrasive stainless steel polish such as 3M® or ZEP®, to polish and buff out the stainless luster and grain. Always scrub lightly, with clean cotton cloth, and with the grain.

DO NOT allow deposits to accumulate or remain on the hood.

DO NOT use ordinary steel wool or steel brushes. Small bits of steel may adhere to the surface and cause rusting.

Venting Requirements

Vent system must terminate to the outside (roof or side wall).

DO NOT terminate the vent system in an attic or other enclosed area.

DO NOT use 4" (10.2 cm) laundry-type wall caps.

Use metal/aluminum vent only. Rigid metal/aluminum vent is recommended.

DO NOT use plastic vent.

Always keep the duct clean to ensure proper airflow.

Calculate the following figures before installation;

1. Distance from the floor to the ceiling.
2. Distance between the floor to the countertop/stove (US Standard: 36").
3. Distance between the countertop/stove to the range hood (recommend* 28" to 36").
4. Height of hood and duct cover.

For the most efficient & quiet operation:

It is recommended that the range hood be vented vertically through the roof through 8" (20.32 cm) or bigger round metal/aluminum vent work.

The size of the vent should be uniform.

Use no more than three 90° elbows.

Make sure there is a minimum of 24" (61 cm) of straight vent between the elbows if more than one elbow is used.

DO NOT install two elbows together.

The length of vent system and number of elbows should be kept to a minimum to provide efficient performance.

The vent system must have a damper. If roof or wall cap has a damper, DO NOT use damper (if supplied) on top of the range hood.

Use duct tape to seal all joints in the vent system.

Specifications

Body	Stainless Steel
Power Rating	220V/50Hz or 120V/60Hz (USA & Canada standard)
General Input Power	120W + # of Light x Voltage of Light
Motor Input Power	120 W
Motor Revolution	600 RPM ($\pm 10\%$) to 1300 RPM ($\pm 10\%$)
Levels Of Speed Control	4
Maximum Airflow	1000 CFM
Air Pressure	150 Pa (200 Pa Maximum)
Noise Level (dB / sone)	Approximately 35 / 0.7 to 67 / 6.5 (Lowest to highest Speed)
Motor Type	Double Chamber Ultra Quiet
Fan Type	Centrifugal / Sirocco
Control Type	Mechanical Push Button
Filtration Type	Baffle Filter
Illumination	LED 3W 12V or Halogen 35W Type GU10 120V (220V for Europe)
Venting Size	Top, 8 inches Round
Interference Protection	Radio Frequency Interference Protected

* Subject to change without notice, please contact your local reseller for details.

turn off the burner. BE CAREFUL TO PREVENT BURNS. If the flames do not go out immediately, EVACUATE AND CALL THE FIRE DEPARTMENT. NEVER

PICK UP A FLAMING PAN— you may be burned.

DO NOT USE WATER, including wet dishcloths or towels — a violent steam explosion will result. Use an extinguisher ONLY if:

You know you have a Class ABC extinguisher, and you already know how to operate it.

The fire is small and contained in the area where it is started.

The fire department is being called. You can fight the fire with your back to an exit.

Height & Clearance

Maximum ceiling clearance 110" at 36" hood mounting height above countertop/stove (may vary with different model). Chimney extensions available for higher ceilings.

Important

A minimum of 8" round (standard for this range hood) must be used to maintain maximum airflow efficiency.

Always use rigid type metal/aluminum ducts if available to maximize airflow when connecting to provided duct.

Please use Duct Run Calculation below to compute total available duct run when using elbows, transitions and caps.

ALWAYS, when possible, reduce the number of transitions and turns. If long duct run is required, increase duct size from 8" to 9 or 10". If a reducer is used, install a long reducer instead of a pancake reducer. Reducing duct size will restrict airflow and decrease airflow, thus reduce duct size as far away from opening as possible.

If turns or transitions are required: Install as far away from opening and as far apart, between 2, as possible.

Minimum mount height between range top to hood bottom should be no less than 24".

Maximum mount height should be no higher than 36"

It is important to install the hood at the proper mounting height. Hoods mounted too low could result in heat damage and fire hazard; while hoods mounted too high will be hard to reach and will lose its performance and efficiency.

If available, also refer to manufacturer's height clearance requirements and recommended hood mounting height above range.

Use and Care Information

WARNING — TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS, OBSERVE

THE FOLLOWING: Use this unit only in the manner intended by the manufacturer. If you have questions, contact the manufacturer. Before servicing or cleaning unit, switch power off at service panel and lock switch power off at service panel and lock service panel to prevent power from being switched on accidentally. When the service disconnecting means cannot be blocked, securely fasten prominent warning device such as a tag to the service panel.

CAUTION: For general ventilating use only. Do not use to exhaust hazardous or explosive materials and vapors.

WARNING — TO REDUCE THE RISK OF A RANGE

TOP GREASE FIRE: Never leave surface units unattended at high settings. Boil overs cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings.

Always turn hood ON when cooking at high heat or when cooking flaming foods.

Clean ventilating fans frequently. Grease should not be allowed to accumulate on fan or filter.

Use proper pan size. Always use cookware appropriate for the size of the surface element.

WARNING — TO REDUCE THE RISK OF INJURY TO PERSONS IN THE EVENT OF A RANGE TOP GREASE FIRE, OBSERVE THE FOLLOWING: SMOTHER

FLAMES with a close-fitting lid, cookie sheet, or metal tray, then

The lights work but the blower is not spinning at all, is stuck or is rattling

The blower might be jammed or scraping the bottom due to shipping damage. Please contact us immediately.

The hood is not venting out properly

- Make sure the distance between the stove top and the bottom of the hood is within * 28" and 36" in distance. *Due to different ceiling height configurations, recommended height may not be applicable.
- Reduce the number of elbows and length of duct work. Check if all joints are properly connected, sealed, and taped.
- Make sure the power is on high speed for heavy cooking.

Purpose of the slots/holes/openings near the top of the upper chimney:

- These slots/holes/openings are used to exhaust cleaned air with optional re-circulating kit. If you did not install one, you do not need them.

NOTE: For all other inquiries, please contact your local reseller.

Minimum Duct Size:

Round - 8" minimum

Calculating Vent System Length

To calculate the length of the system you need, deduct the equivalent feet for each vent piece used in the system from the recommended maximum duct run.

DUCT RUN CALCULATION:	
Recommended maximum run	
8" duct	50 ft
Vent piece deduction	
Each 90 elbow used	9 ft
Each 45 elbow used	5 ft
Each 8" to 3-1/4 x 10" transition used	7 ft
Side wall cap with damper	0 ft
Roof cap	0 ft

DUCT RUN CALCULATION EXAMPLE:

One roof cap, two 90° elbow, and one 45° elbow used: 0ft + 9ft + 9ft + 5ft = 23ft used.

Deduct 23ft from 50ft, 27ft maximum available for straight duct run.

Troubleshooting

If the range hood or halogen light does not work after installation

- Check if the range hood has been plugged in, make sure that all power has been turned back ON, fused not blown and all electrical wiring are properly connected.
- Swap out light assembly to working ones to determine whether it is caused by defective bulbs. See *Replacing the light bulbs* on Page 31-33.

The range hood vibrates when the blower is on

- The range hood might not have been secured properly on to the ceiling or wall. Check with your installer

The blower or fan seems weak

- Check that the duct sized used is at least 8" or 3-1/4 x 10". Range hood WILL NOT function efficiently with insufficient duct size. For example: 8" duct over 8" hole and loosely secured.
- Check if duct is clogged or if damper unit (half-circular flapper) is not installed correctly or opening properly. A tight mesh on a side wall cap unit might also cause restriction to the air flow.

Product Dimension

Model	VRH-BC02-30SS	VRH-BC02-36SS
A	1 1/2"	1 1/2"
B	2 1/2"	2 1/2"
C	7 7/8"	7 7/8"
D	3 3/4"	3 3/4"
E	5 7/8"	5 7/8"
F	15 1/4"	15 1/4"
G	28"	33 7/8"
H	16 1/4"	16 1/4"
I	28 1/2"	34 1/2"
J	11 3/4"	11 3/4"

Venting Methods

This range hood is factory set for venting through the roof or wall.

Vent work can terminate either through the roof or wall. To vent through a wall, a 90° elbow is needed.

IMPORTANT:

NEVER exhaust air or terminate duct work into spaces between walls, crawl spaces, ceiling, attics or garages. All exhaust must be ducted to the outside.

Use metal/aluminum duct work only.

Fasten all connections with sheet metal screws and tape all joints with certified Silver Tape or Duct Tape.

Use caulking to seal exterior wall or roof opening around the cap.

Electrical Requirements

IMPORTANT: Observe all governing codes and ordinances.
(Please consult with a qualified electrician for 220-Volt 50 Hz voltage)

IT IS THE CUSTOMER'S RESPONSIBILITY:

To contact a qualified electrical installer.

To assure that the electrical installation is adequate and in conformance with National Electrical Code, ANSI/ NFPA 70 — latest edition*, or CSA Standards C22. 1-94, Canadian Electrical Code, Part 1 and C22. 2 No. 0-M91- latest edition** and all local codes and ordinances.

If codes permit and a separate ground wire is used, it is recommended that a qualified electrician determine that the ground path is adequate.

A 120-volt, 60 Hz, AC-only, fused electrical supply is required on a separate 15-amp circuit, fused on both sides of the line.

Do not ground to a gas pipe.

Do not have a fuse in the neutral or ground circuit.

RISK OF ELECTRICAL SHOCK. This range hood must be properly grounded. Check with a qualified electrician if you are not sure whether the range hood is properly grounded.

The range hood should be connected directly to the fused disconnect (or circuit breaker) box through flexible armored or non-metallic sheathed copper cable. A U.L. - or C.S.A. - listed strain relief must be provided at each end of the power supply cable. Do not use extension cord or adapter plug with this appliance.

Wiring Diagram

Operations

Turn On

- Press the speed control (Low Speed, Medium Speed, High Speed) switch to select the desired level of power. Once button is pressed, the previous speed mode will cancel.
- Press the Light Switch to power on the lights.

Turn Off

- Press the Power Switch to turn off the power.
- Press the Light Switch to power off the lights

The range hood must be connected with copper wire/plug only.

Always use plug provided. If not possible, connect three wires according to its color (black to hot, white to neutral, and green to ground) to house wires and cap with wire connectors:

WARNING

Hood may have very sharp edges. Please wear protective gloves if it is necessary to remove any parts for installing, cleaning or servicing.

WARNING

Hazard of electrical shock! Electrical wiring must be done by qualified person.

Wire sizes (copper wire only) and connections must conform with the rating of the appliance as specified on the model/serial rating label. Wire sizes must conform to the requirements of the National Electrical Code ANSI/NFPA 70 — latest edition*, or CSA Standards C22. 1-94, Canadian Electrical Code Part 1 and C22. 2 No. 0-M91 - latest edition** and all local codes and ordinances. A U.L. - or C.S.A. - listed conduit connector must be provided at each end of the power supply cable (at the range hood and at the junction box).

Copies of the standards listed may be obtained from:

National Fire Protection Association
Batterymarch Park Road
Quincy, Massachusetts 02269

** CSA International
8501 East Pleasant Valley
Cleveland, Ohio 44131-5575

Installation

WARNING: EXCESSIVE WEIGHT

Require two or more person to move and install this range hood. Spinal or other bodily injuries could occur if it is not followed.

NOTE: DO NOT INSTALL THIS POWER PACK RANGE HOOD INSERT BEFORE RUNNING A TEST AND MAKE SURE THE UNIT IS IN GOOD CONDITION. MECHANICAL DAMAGE MIGHT HAVE OCCURRED DURING TRANSPORTATION.

1. Remove the decorative panel from the power pack range hood.
2. Cut an opening in the bottom of the cabinet, using the dimensions shown in the table below (ref. to Fig. A).
3. Insert the range hood in the cabinet and secure with the (4) mounting screws from the inner side of the range hood (Fig. B). Note: Wood blocking might need to be built if it's not available in order to secure the mounting screws.
4. Connect the duct and power cord.
5. Replace the decorative panel.

Model	X	Y
VRH-BC02-30SS	27 1/2"	15 1/4"
VRH-BC02-36SS	33 1/2"	15 1/4"
