22 cu. ft. 36-Inch Width Counter Depth French Door Refrigerator with Interior Dispense

★★★★☆ 4.1 (438)
Write a review

This 72-inch refrigerator is three inches taller than a standard counter-depth refrigerator. It fills the gap that can be left above many refrigerators, adding to its integrated appeal. A pull-out freezer drawer allows you to organize frozen items on three levels. And with the ExtendFresh™ Temperature Management System all of your ingredients will be held at the optimum temperature to maximize their flavor and texture.

AVAILABLE COLOR OPTIONS

Stainless Steel - KRFC302ESS

FEATURES

ExtendFresh™ Plus Temperature Management System

Ensures ingredients remain fresh for maximum taste and texture using a sensor-controlled system with a variable-capacity compressor. There is one thermistor in the freezer and one thermistor in the refrigerator.

Interior Water Dispenser

provides easy access to filtered water and is conveniently located for one-hand operation.

Produce Preserver

Absorbs ethylene gas emitted by many fruits and vegetables, causing them to over ripen. By removing ethylene, the produce preserver helps extend freshness.

Electrical: A 115 volt, 60 Hz, AC only 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator and approved accessories be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

Water: A cold water supply with water pressure of between 35 and 120 psi (241 and 827 kPa) is required to operate the water dispenser and ice maker. If you have questions about your water pressure, call a licensed, qualified plumber.

Reverse Osmosis Water Supply: IMPORTANT: The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 35 and 120 psi (241 and 827 kPa).

LOCATION REQUIREMENTS

½" (1.25 cm)

2½" (6.3 cm)

IMPORTANT: This refrigerator is designed for indoor, household use only.

To ensure proper ventilation for your refrigerator, allow for ½" (1.25 cm) of space on each side and at the top. Allow for 1" (2.54 cm) of space behind the refrigerator. If your refrigerator has an ice maker, allow extra space at the back for the water line connections. When installing your refrigerator next to a fixed wall, leave 2½" (6.3 cm) minimum on the hinge side (some models require more) to allow for the door to swing open.

NOTE: This refrigerator is intended for use in a location where the temperature ranges from a minimum of 55°F (13°C) to a maximum of 110°F (43°C). The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between 60°F (15°C) and 90°F (32°C). It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.

SPECIAL FEATURES

CRS
CFM REDUCTION
Elica CRS:
CFM Reduction System (CRS), is an exclusive feature to Elica hoods, which enables the installer to reduce the maximum blower CFM, to meet local code requirements.

HEAT GUARD

Elica Heat Guard:
A safety feature that protects the hood and cabinetry from excessive heat, by sensing extreme temperatures (>158 degrees) and will automatically adjusts the blower speed to HIGH. Blower speed will automatically adjust back once temperatures drop to a safe level.
