Installation Specifications

1. Measure the height, width and depth of the opening, making sure to include baseboards, molding tile, countertop overhang, etc. Check to be sure there is enough room to open the door (consider walls, islands or other obstacles when measuring).
2. Refer to illustration below to determine dimensions.
3. Allow 3.75" of clearance on hinge side of refrigerator when installing next to a wall where handle may make contact.
4. Allow 2" minimum clearance at rear for proper air circulation and water/electrical connections. Allow a 3/8" minimum clearance at sides and top for ease of installation.
5. Ensure each door and entryway in the home is wide enough for the refrigerator to be moved through easily.

For optimal usage and to be able to open refrigerator doors completely, do not install next to a wall.

Please note: The following dimension and cutout information is for planning purposes only. For complete installation details, consult manual packed with product, or download manual online at [samsung.com](https://www.samsung.com).

SAMSUNG

Signature Features

Intelligent User Experience

- Simplified control panel remembers your cooking habits while offering intuitive messaging on an LCD with one knob and minimum buttons.

Air Fry

- The ideal way to cook healthier fried food as it eliminates excess fat, but everything is still crispy and brown outside and juicy inside.

True Convection

- A heated fan distributes heat all around the oven and keeps the temperature constant so dishes are cooked quickly and thoroughly.

Wi-Fi Connectivity

- Monitor and control the oven using the SmartThings App¹. And control the oven with your voice using a voice assistant², such as Samsung Bixby³, Amazon Alexa or Google Assistant.

Fingerprint Resistant Finish

- Prevents surfaces from being covered in unsightly fingerprints or marks and smudges.

SAMSUNG

6.3 cu. ft. Slide-In Electric Range

Installation Specifications

IMPORTANT: To eliminate the risk of burns or fire caused by reaching over heated surface units, avoid having cabinet storage space located above the surface units. If you have cabinet storage space over the heating elements, you can reduce the risk by installing a range hood that projects horizontally a minimum of 5 inches beyond the bottom of the cabinets.

* A minimum of 30" is required between the top of the cooking surface and the bottom of an unprotected wood or metal cabinet; a minimum of 24" is required if the bottom of the wood or metal cabinet is protected by not less than 1/4" of flame retardant millboard covered with not less than no.28 MSG of sheet steel, 0.015" of stainless steel, 0.024" of aluminum, or 0.020" of copper.

** A minimum of 15" is required between the countertop and the adjacent cabinet bottom.

Dimensions

CAUTION: This range has been designed to comply with the maximum allowable wood cabinet temperatures of 194 °F. Make sure the wall covering, countertops, and cabinets around the range can withstand the heat (up to 194 °F) generated by the range. If not, discolouration, delamination, or melting may occur.
