A growing trend in the installation of kitchen appliances is mounting flush. This allows the consumer to present their appliances with a clean, flush with the cabinet face appearance. In this installation type, there are two ways to accomplish this look: 1/4" front extended and true flush.

*Can also be installed using an electrical outlet in an adjacent cabinet within the area where the provided electrical cord can reach. Power cord access hole in cabinet should be a minimum 1 1/2" (38 mm) diameter hole and deburred of all sharp edges.
Notes

In the flush 1/4" front extended application, the appliance can be mounted slightly "proud" of the cabinet cutout, which will create a flush appearance. Having the 1/4" extension also allows to hide the cabinet cutout edges.
