File Duo™ Slide-in Electric Range

There must be 30" of minimum elevation between the top of the coupling surface and there must be the bottom of an aquifer and second or third above it. 74" minimum when the bottom of the coupling is metal cabinet is protected by not less than 1/4" flame retardant material covered with not less than no. 28 M.S.S. sheet steel, 0.015" stainless steel, 0.024" aluminum or 0.030" copper.

Glass cooktop overhangs and sits on top of your kitchen countertop to give a built-in look. Cut-out space for the range is 29 1/2".

SAMSUNG

These results indicate that the proposed approach of separating the system, creating an end system in the peripheral I/O system, and using the peripheral I/O system to access the end system is a viable approach. The end system can be implemented in a variety of ways, including a dedicated hardware device, a software device, or a combination of hardware and software. The end system can also be implemented in a variety of ways, including a dedicated hardware device, a software device, or a combination of hardware and software. The end system can also be implemented in a variety of ways, including a dedicated hardware device, a software device, or a combination of hardware and software.

NE58F9710WS

Flex Duo™ Slide-In Electric Range

Installing Your Range

There must be 30" of minimum clearance between the top of the cooking surface and there must be the bottom of an unobstructed wood or metal cabinet or 24" minimum when the bottom of the wood or metal cabinet is protected by not less than 3/4" flame retardant material covered with not less than no. 28 MSG, sheet steel, 0.015" stainless steel, 0.024" aluminum or 0.020" copper.

** 15" minimum between the countertop and the adjacent cabinet bottom.

WARNING: To eliminate the risk of burn-injury, the caused by reacting superheated surface units, cabinet storage space located above the surface units should be avoided. If cabinet storage is to be provided, the use can be reduced by installing a range hood that projects horizontally a minimum of 9" beyond the bottom of the cabinets.

Dimensions

Clear cooking overtop and sits on top of your kitchen countertop to give a built-in look. Cut-out space for the range is 35 1/4".

INTERIOR FINISHES ACKNOWLEDGEMENT / HARDWOOD WAIVER

Purchaser accepts and acknowledges that the Builder reserves the right to substitute materials with those of equal or better quality where the manufacture, scheduling or delivery of materials may directly impact the Builder's ability to meet its' contractual obligations under the Agreement of Purchase and Sale.

PORCELAIN & NATURAL STONES: Due to the properties of natural stones including but not limited to marble, granite, quartz, no two pieces are exactly the same. Variations in colour, tone, granularity (pitting, fissures) and pattern are to be expected, including various lighting may affect the overall finished look. Stone should never be cleaned with lemon oil or vinegar. The purchaser acknowledges colour and product variations as well as natural imperfections that may exist with the selection of natural stone materials and shall not hold the Vendor liable for provision of same.

STONE COUNTERTOP JOINTS: Purchaser is aware that one joint will be at each corner and on either side of slide-in-range (if applicable). It will also be where the length of the counter top exceeds the length of a stone slab. Slabs are usually approximately 5'x 8'.

CERAMIC TILES: Due to manufacturing, shade (dye lots), product variations may exist that can affect the overall look of the finished product. Although every effort will be made to ensure the colours and materials selected are as close as possible to the samples, the purchaser acknowledges that the sample tiles supplied in the Design Centre may not be identical to the materials installed in the home.

STAIR STAINS: Due to the natural properties of wood, many variables can affect the overall look of the finished product. Factors including but not limited to wood type, knotting, graining, density, age, humidity, and air temperature can result in substantial variations in stain intensity. The purchaser accepts that although the Vendor will do their best to match stain the unfinished stairs as close as possible to the pre-finished floors, it is not possible to have an identical match and that there MAY be shade differences between the two products.

CABINETRY: Due to the natural properties of wood, slight variations apparent with cabinetry are to be expected. This includes but not limited to wood species, wood grain, colour, finish, product variations, and natural imperfections are all factors that may affect the overall look of the finished product. Such factors make exact colour matching impossible. The type and intensity of lighting in the areas of designated cabinetry placement may also highlight characteristics of cabinetry finish. All cabinets shall be finished with a white melamine interior box unless a finished interior is upgraded. Due to building specifications and/or on-site conditions, certain cabinetry upgrades may not be possible. The purchaser acknowledges that the Builder cannot guarantee the cabinetry finish or provision of certain upgrades and shall not hold the Builder liable for provision of same.

UPGRADES/EXTRAS: All upgrades and additional selections indicated on the colour chart must be accompanied by an upgrades/extras sheet (PES) and full payment otherwise the selection will be invalid. All colour charts and upgrades/extras will not proceed until verified and signed by an authorized signing officer at the Vendor's head office. **CHANGES WILL NOT BE PERMITTED UPON COMPLETION AND SUBMISSION OF THE COLOUR CHART.**

HARDWOOD FLOORING: Due to the natural properties of wood, many variables can affect the overall look of the finished product. Variations include but not limited to wood type, colour/stain and wood grain are significant factors that make exact colour matching impossible. The purchaser acknowledges that the hardwood flooring is a pre-finished product in a controlled environment. Expansion, compression and cupping are characteristics of hardwood flooring once installed in the home. The purchaser acknowledges these may become apparent over time and despite the Builders' efforts to install the hardwood flooring materials in keeping with good workmanship, the Builder shall not be responsible nor held liable for minor variances of fluctuation in hardwood flooring materials.

HARDWOOD WAIVER:

I/We understand hardwood flooring is classified as a porous material and as such not recommended by the Builder in certain areas. I/We understand there is a concern due to possible water and other substances being frequently splashed or spilled onto the floor and in contravention of Ontario Building Code Section 9.30.1.2(1).

"Finished flooring bathrooms, kitchens, public entrance halls, laundry & general storage areas shall consist of resilient flooring, felted-synthetic-fibre floor coverings, concrete, terrazzo, ceramic tile, mastic or other types of flooring providing similar degrees of water resistance."

I/We are prepared to assume full responsibility for any damage caused to the hardwood floor or subfloor due to moisture absorbency in the mentioned areas, and agree to waive any claims against the Township of residence, TARIION and/or the Builder in relation to the matter.
