|-----------------------------------|----------------------|--------------------------|-----------------|
| PURCHASER: Zancor Homes (Cooksto) | JOB NAME: LOT 16 CKT | Q3800 | August 10, 2017 |
| | | SALES REP: Giovanni Toto | |

CUSTOMER WAIVER FOR CUSTOMERS SELECTING TO SUPPLY AND/OR INSTALL THEIR OWN HANDLES OR KNOBS ON CABINETRY

Customers are strongly recommended to select a handle from QTK's vast selection of decorative hardware at the time of door style and finish selections.

Please be advised, if the customer selects to not have decorative hardware (handles or knobs) installed by QTK, QTK will not be responsible for correcting any damages that may arise. This includes but is not limited to any scratches or touch ups required on any doors. The customer accepts full responsibility for any damage caused by installing their own hardware.

Customer acknowledges and understands that if they later decide they want QTK to install handles or knobs that either the customer has purchased from QTK or from another source that the customer will be responsible for the charges as per the QTK Fees & Changes Schedule set out in the Purchase Terms Form in addition to the cost of the actual hardware and installation of the hardware.

Please note that the cost QTK charges to drill & install the handles on site will be SIGNIFICANTLY higher than when they are drilled and installed in the factory - the reason is all our decorative handle drilling is completed by CNC machinery which makes the process very accurate and reliable.

By signing below the customer acknowledges and understands all of the items listed above and is forfeiting their warranty on the finish of the doors.

INTERIOR FINISHES ACKNOWLEDGEMENT / WAIVER

Purchaser accepts and acknowledges that the Builder reserves the right to substitute materials with those of equal or better quality where the manufacture, scheduling or delivery of materials may directly impact the Builder's ability to meet its' contractual obligations under the Agreement of Purchase and Sale.

PORCELAIN & NATURAL STONES: Due to the properties of natural stones including but not limited to marble, granite, quartz, no two pieces are exactly the same. Variations in colour, tone, granularity (pitting, fissures) and pattern are to be expected, including various lighting may affect the overall finished look. Stone should never be cleaned with lemon oil or vinegar. The purchaser acknowledges colour and product variations as well as natural imperfections that may exist with the selection of natural stone materials and shall not hold the Vendor liable for provision of same.

STONE COUNTERTOP JOINTS: Purchaser is aware that one joint will be at each corner and on either side of slide-in-range (if applicable). It will also be where the length of the counter top exceeds the length of a stone slab. Slabs are usually approximately 5'x 8'.

CERAMIC TILES: Due to manufacturing, shade (dye lots), product variations may exist that can affect the overall look of the finished product. Although every effort will be made to ensure the colours and materials selected are as close as possible to the samples, the purchaser acknowledges that the sample tiles supplied in the Design Centre may not be identical to the materials installed in the home.

STAIR STAINS: Due to the natural properties of wood, many variables can affect the overall look of the finished product. Factors including but not limited to wood type, knotting, graining, density, age, humidity, and air temperature can result in substantial variations in stain intensity. The purchaser accepts that although the Vendor will do their best to match stain the unfinished stairs as close as possible to the pre-finished floors, it is not possible to have an identical match and that there MAY be shade differences between the two products.

CABINETRY: Due to the natural properties of wood, slight variations apparent with cabinetry are to be expected. This includes but not limited to wood species, wood grain, colour, finish, product variations, and natural imperfections are all factors that may affect the overall look of the finished product. Such factors make exact colour matching impossible. The type and intensity of lighting in the areas of designated cabinetry placement may also highlight characteristics of cabinetry finish. All cabinets shall be finished with a white melamine interior box unless a finished interior is upgraded. Due to building specifications and/or on-site conditions, certain cabinetry upgrades may not be possible. The purchaser acknowledges that the Builder cannot guarantee the cabinetry finish or provision of certain upgrades and shall not hold the Builder liable for provision of same.

UPGRADES/EXTRAS: All upgrades and additional selections indicated on the colour chart must be accompanied by an upgrades/extras sheet (PES) and full payment otherwise the selection will be invalid. All colour charts and upgrades/extras will not proceed until verified and signed by an authorized signing officer at the Vendor's head office. **CHANGES WILL NOT BE PERMITTED UPON COMPLETION AND SUBMISSION OF THE COLOUR CHART.**

HARDWOOD / LAMINATE FLOORING: Due to the properties of wood and laminate, many variables can affect the overall look of the finished product. Variations include but not limited to wood type or laminate finish, colour/stain and wood grain are significant factors that make exact colour matching impossible. The purchaser acknowledges that the hardwood flooring is a pre-finished product in a controlled environment. Expansion, compression and cupping are characteristics of hardwood flooring once installed in the home. The purchaser acknowledges these may become apparent over time and despite the Builders' efforts to install the hardwood flooring materials in keeping with good workmanship, the Builder shall not be responsible nor held liable for minor variances of fluctuation in hardwood flooring materials.

UPGRADES/EXTRAS: All upgrades and additional selections indicated on the colour chart must be accompanied by an upgrades/extras sheet (PES) and full payment otherwise the selection will be invalid. All colour charts and upgrades/extras will not proceed until verified and signed by an authorized signing officer at the Vendor's head office. **CHANGES WILL NOT BE PERMITTED UPON COMPLETION AND SUBMISSION OF THE COLOUR CHART.**

HARDWOOD / LAMINATE WAIVER:

I/We understand hardwood flooring is classified as a porous material and as such not recommended by the Builder in certain areas. I/We understand there is a concern due to possible water and other substances being frequently splashed or spilled onto the floor and in contravention of Ontario Building Code Section 9.30.1.2(1).

"Finished flooring bathrooms, kitchens, public entrance halls, laundry & general storage areas shall consist of resilient flooring, felted-synthetic-fibre floor coverings, concrete, terrazzo, ceramic tile, mastic or other types of flooring providing similar degrees of water resistance."

I/We are prepared to assume full responsibility for any damage caused to the hardwood floor or subfloor due to moisture absorbency in the mentioned areas, and agree to waive any claims against the Township of residence, TARION and/or the Builder in relation to the matter.

Specs to follow
Additional charges may apply for cabinetry, electrical and plumbing in order to accommodate the specs given by the homeowner.

NOTE: It is the Purchaser's responsibility to coordinate delivery, installation and hook up of appliances and to ensure they are installed as per Manufacturers specifications after closing.

Purchaser acknowledges responsibility for providing correct specification for such appliances. The purchaser agrees to deliver forthwith to the Builder the manufacturer's appliance specifications where the size exceeds the standard openings.

If specs not received, the standard openings as determined by Zancor Homes will be provided. If rework/repair is required due to late specs received, additional costs will be applied.

Appliance Specs are DUE (if not received during appointment):

2 WEEKS FROM SIGNED DATE ABOVE – Specs received after this date and changes are required to accommodate the appliances, an administration fee of minimum \$250 will apply.

*Changes must be approved by head office.

books

△ As defined in the "National Fuel Gas Code" (ANSI Z223.1, Current Edition), Clearances from non-combustible materials are not part of the ANSI Z21.1 scope and are not certified by CSA. Clearances of less than 12" (305 mm) must be approved by the local codes and/or by the local authority having jurisdiction.

These warranties give you specific legal rights and you may have other rights that vary from state to state. Full warranty and limited warranty from date of installation. For complete warranty details, refer to your Use & Care manual, or ask your dealer.

Specifications are for planning purposes only. Refer to installation instructions and consult your countertop supplier prior to making counter opening. Consult with a heating and ventilation engineer for your specific ventilation requirements. For the most detailed information, refer to installation instructions accompanying product or write to Thermador indicating the model number. Specifications are correct at time of printing. Thermador reserves the right to change product specifications or design without notice. Some models are certified for use in Canada. Thermador is not responsible for products that are transported from the U.S. for use in Canada.

Front-Loading Washer

Lo616
C00XLS

PRODUCT MODEL NUMBERS

WFW75HEF, WFW85HEF,
WFW90HEF, WFW92HEF

Washer Dimensions:

Recessed or closet installation -
stacked washer and dryer

* Add spacing of 1" (25 mm) on all sides of washer/dryer.

PRODUCT MODEL NUMBERS

WFW7590F, WFW9290F,

Washer Dimensions:

Recessed area or closet installation (washer only):

* Add spacing of 1" (25 mm) on all sides of washer.

Custom cabinet installation (washer only):

** Recommended 4" (102 mm), minimum 1.5" (38 mm)

ELECTRICAL REQUIREMENTS

A 120 volt, 60 Hz., AC only, 15- or 20-amp, fused electrical supply is required. A time-delay fuse or circuit breaker is recommended. It is recommended that a separate circuit serving only this appliance be provided.

DRAIN SYSTEM

Drain system can be installed using a floor drain, wall standpipe, floor standpipe, or laundry tub. Select method you need.

IMPORTANT: To avoid siphoning, only 4.5" (114 mm) of drain hose should be inside standpipe. Always secure drain hose with cable tie.

Floor standpipe drain system

Minimum diameter for a standpipe drain: 2" (51 mm). Minimum carry-away capacity: 17 gal. (64 L) per minute. A 1/4" (6 mm) diameter to 1" (25 mm) diameter Standpipe Adapter Kit is available (Part Number 3363920). Top of standpipe must be at least 30" (762 mm) high; install no higher than 96" (2.44 m) from bottom of washer. If you have an overhead sewer and need to pump higher than 96" (2.44 m), a sump pump and associated hardware are needed. See "Alternate Parts".

Wall standpipe drain system

See requirements for floor standpipe drain system.

Undercounter installation - washer only:

All dimensions show recommended spacing allowed, except for closet door ventilation openings which are the minimum required.

For each arrangement, consider allowing more space for ease of installation and servicing, and spacing for companion appliances and clearances for walls, doors, and floor moldings.

Space must be large enough to allow door to fully open. Add spacing of 1" (25 mm) on all sides of washer to reduce noise transfer. If a closet door or louvered door is installed, top and bottom air openings in door are required.

Laundry tub drain system

Minimum capacity: 20 gal. (76 L). Top of laundry tub must be at least 30" (762 mm) above floor. Install no higher than 96" (2.44 m) from bottom of washer.

Floor drain system

Floor drain system requires a Siphon Break Kit (Part Number 285834), 2 Connector Kits (Part Number 285835), and an Extension Drain Hose (Part Number 285863) that may be purchased separately. See "Alternate Parts". Minimum siphon break height: 28" (710 mm) from bottom of washer. (Additional hoses may be needed.)

Because Whirlpool Corporation policy includes a continuous commitment to improve our products, we reserve the right to change materials and specifications without notice.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

These warranties give you specific legal rights and you may have other rights that vary from state to state. Full warranty and limited warranty from date of installation. For complete warranty details, refer to your Use & Care manual, or ask your dealer.

Specifications are for planning purposes only. Refer to installation instructions and consult your countertop supplier prior to making counter opening. Consult with a heating and ventilation engineer for your specific ventilation requirements. For the most detailed information, refer to installation instructions accompanying product or write to Thermador indicating the model number. Specifications are correct at time of printing. Thermador reserves the right to change product specifications or design without notice. Some models are certified for use in Canada. Thermador is not responsible for products that are transported from the U.S. for use in Canada.

Installation spacing for recessed area or closet installation

Side view:

The side view of the box is shown with two vertical dimension lines. The outer dimension line indicates a total height of 5 inches (1220 mm). The inner dimension line, which is offset from the outer one, indicates a height of 3 inches (787 mm) for the main body of the box.

Back view:

6 1/2" (165 mm)

Power supply cord/cable

Water inlet (Steam models)

297/6H* (759 mm)

165 mm

- Additional spacing should be considered for ease of installation and servicing.
- Additional clearances might be required for wall, door, floor moldings, and dryer venting.
- Additional spacing should be considered on all sides of the dryer to reduce noise transfer.
- For closet installation with a door, minimum ventilation openings in the top and bottom of the door are required. Louvered doors with equivalent ventilation openings are acceptable.

■ Companion appliance spacing should also be considered.

*0" (0 mm) spacing is allowed for straight-back venting only.
For steam models only, inlet hose must not be kinked.

Minimum installation clearances (dryer only):

| | Front | Sides | Rear | Top |
|---------------|-------|------------|-------------|-----------|
| Recessed | NA | 0" (0 mm) | 0" (0 mm)** | 0" (0 mm) |
| Closest | NA | 0" (0 mm) | 0" (0 mm)** | 0" (0 mm) |
| Under Counter | NA | 1" (25 mm) | 0" (0 mm)** | 0" (0 mm) |

****0" (0 mm) spacing is allowed for straight-back venting only.**

Custom under counter installation:

60616 100K5

ELECTRICAL REQUIREMENTS

To supply the required 3- or 4-wire, single phase, 120/240 volt, 60 Hz, AC only electrical supply (or 3- or 4-wire, 120/208 volt electrical supply, if specified on the serial/rating plate) on a separate 30-amp circuit, fused on both sides of the line. Connect to an individual branch circuit. Do not have a fuse in the neutral or grounding circuit. Do not use an extension cord.

VENTING REQUIREMENTS

Exhaust venting: Exhaust your dryer to the outside. 4" (102 mm) diameter vent is required. Rigid or flexible metal exhaust vent must be used. Do not use plastic or metal foil vet. Exhaust hood must be at least 12" (305 mm) from the ground or any object that may be in the path of the exhaust.

WARNING: To reduce the risk of fire, this dryer **MUST BE EXHAUSTED OUTDOORS.**

IMPORTANT: Observe all governing codes and ordinances.

Dryer exhaust must not be connected into any gas vent, chimney, wall, ceiling, attic, crawlspace, or a concealed space of a building. Only rigid or flexible metal vent shall be used for exhausting.

- Only a 4" (102 mm) heavy metal exhaust vent and clamps may be used.
- Do not use plastic or metal foil vent.

Exhaust hoods:

Recommended Styles:

Louvered Hood

Box Hood

Acceptable Style:

Angled Hood

Determine vent path:

- Select route that will provide straightest and most direct path outdoors.
- Plan installation to use fewest number of elbows and turns.
- When using elbows or making turns, allow as much room as possible.
- Bend vent gradually to avoid kinking.
- Use as few 90° turns as possible.

Determine vent length and elbows needed for best drying performance:

- Use the following "Vent System Charts" to determine type of vent material and hood combinations acceptable to use.

NOTE: Do not use vent runs longer than those specified in "Vent System Charts."

Exhaust systems longer than those specified will:

- Shorten life of dryer.
- Reduce performance, resulting in longer drying times and increased energy usage.

Because Whirlpool Corporation policy includes a continuous commitment to improve our products, we reserve the right to change materials and specifications without notice.

The "Vent System Charts" provide venting requirements that will help achieve best drying performance.

| Standard Vent System Chart | | |
|----------------------------|--------------|-----------------|
| Number of 90° elbows | Type of vent | Angled hoods |
| 0 | Rigid metal | 64 ft. (20 m) |
| 1 | Rigid metal | 54 ft. (16.5 m) |
| 2 | Rigid metal | 44 ft. (13.4 m) |
| 3 | Rigid metal | 35 ft. (10.7 m) |
| 4 | Rigid metal | 27 ft. (8.2 m) |

| Long Vent System Chart | | |
|------------------------|--------------|------------------|
| Number of 90° elbows | Type of vent | Angled hoods |
| 0 | Rigid metal | 160 ft. (48.8 m) |
| 1 | Rigid metal | 150 ft. (45.7 m) |
| 2 | Rigid metal | 140 ft. (42.7 m) |
| 3 | Rigid metal | 130 ft. (39.6 m) |
| 4 | Rigid metal | 120 ft. (36.6 m) |

To determine if your model has a long vent system, refer to the type code located on the serial number plate in the inner door wall. Example: An electric model would be DALV (Long Vent) – ELE – XXXXXX-XXX.

NOTE: For long vent systems, use of box/louvered hoods will improve venting, regardless of length.

The dryer must be connected to the cold water faucet using new inlet hoses (not supplied). Do not use old hoses.

Dimensions are for planning purposes only. For complete details, see installation instructions packed with product. Specifications subject to change without notice.
