Hi Simone,

As per our conversation, the hole for the soap dispenser needs to be 1.25 inches to 1.50 inches. It would need to be placed on the right hand side of the faucet.

Thanks,

Ruth

\*Brick installation requires an additional charge and will be included on the extras if selected\*

Large tiles installation for floor and wall – ½ Brick

Please be advised it has come to our attention, that due to production, many of the over-sized and odd shaped, man-made tiles (i.e. porcelain & ceramic), have been found to have a slight bow in the tile. It is a standard occurrence with all suppliers and manufacturers.

It is therefore recommended, that if and when a purchaser requests to install one of these tiles in a brick-joint pattern, that it be installed on a ½ brick pattern, to try to avoidlippage. Attached with this letter, you will find a layout of the ½ brick installation that has been recommended.

Locations: All floors

Please understand, even in using this ½ brick installation, there may still be minimal lippage which cannot fully be eliminated.

Hence, when there is a request for brick-joint installation, Zancor Homes and their contractor cannot be held responsible for this matter.
