INSTALLATION INSTRUCTIONS

Tools and Parts

Tools Needed

Gather the required tools and parts before starting installation. Read and follow the instructions provided with any tools listed here.

- Measuring tape
- Pencil
- Phillips screwdriver
- Drill
- 7/64" drill bit

Parts Supplied (not shown to scale)

		
Rails (2)	Bottom duct	Trim kit frame
		
Short screws (14) (11 + 3 extra)		Long wood screws (6 - painted) (4 + 2 extra)

Location Requirements

The microwave oven may be installed over a built-in oven. If installing over a built-in oven, make sure there is a minimum of 3" (7.6 cm) between the top of the lower oven cutout and the microwave oven cutout floor.

The microwave oven may also be installed in a cabinet by itself (without a built-in oven below). For best usability, we recommend a minimum distance of 36" (91.4 cm) from the floor to the cutout floor.

Make sure the surrounding cabinetry has clearance to open and close freely. Allow a clearance of at least 1 1/16" (4.0 cm) below the cutout floor (3" [7.6 cm] for installation above a built-in oven), and a clearance of at least 2" (5.1 cm) above the cutout opening.

Required Cutout Dimensions

NOTES:

- Height dimension is critical: 17" (43.2 cm) minimum, 17 1/8" (43.5 cm) maximum.
- Width and depth measurements have $\pm 1/16$ " (2 mm) tolerance.
- 3" (7.6 cm) minimum dimension is from lower oven cutout ceiling to microwave oven cutout floor.
- Trim kit frame extends 1 1/16" (2.7 cm) above and below the cutout opening.
